Estos glifos iluminados permanecen inalterados desde nuestro último encuentro con *La Renegade*. Aunque no hemos logrado traducir completamente el código cromático-numérico de Blacktron, creemos que se trata de una advertencia contra el uso de hipercombustible de un grado demasiado bajo.

135

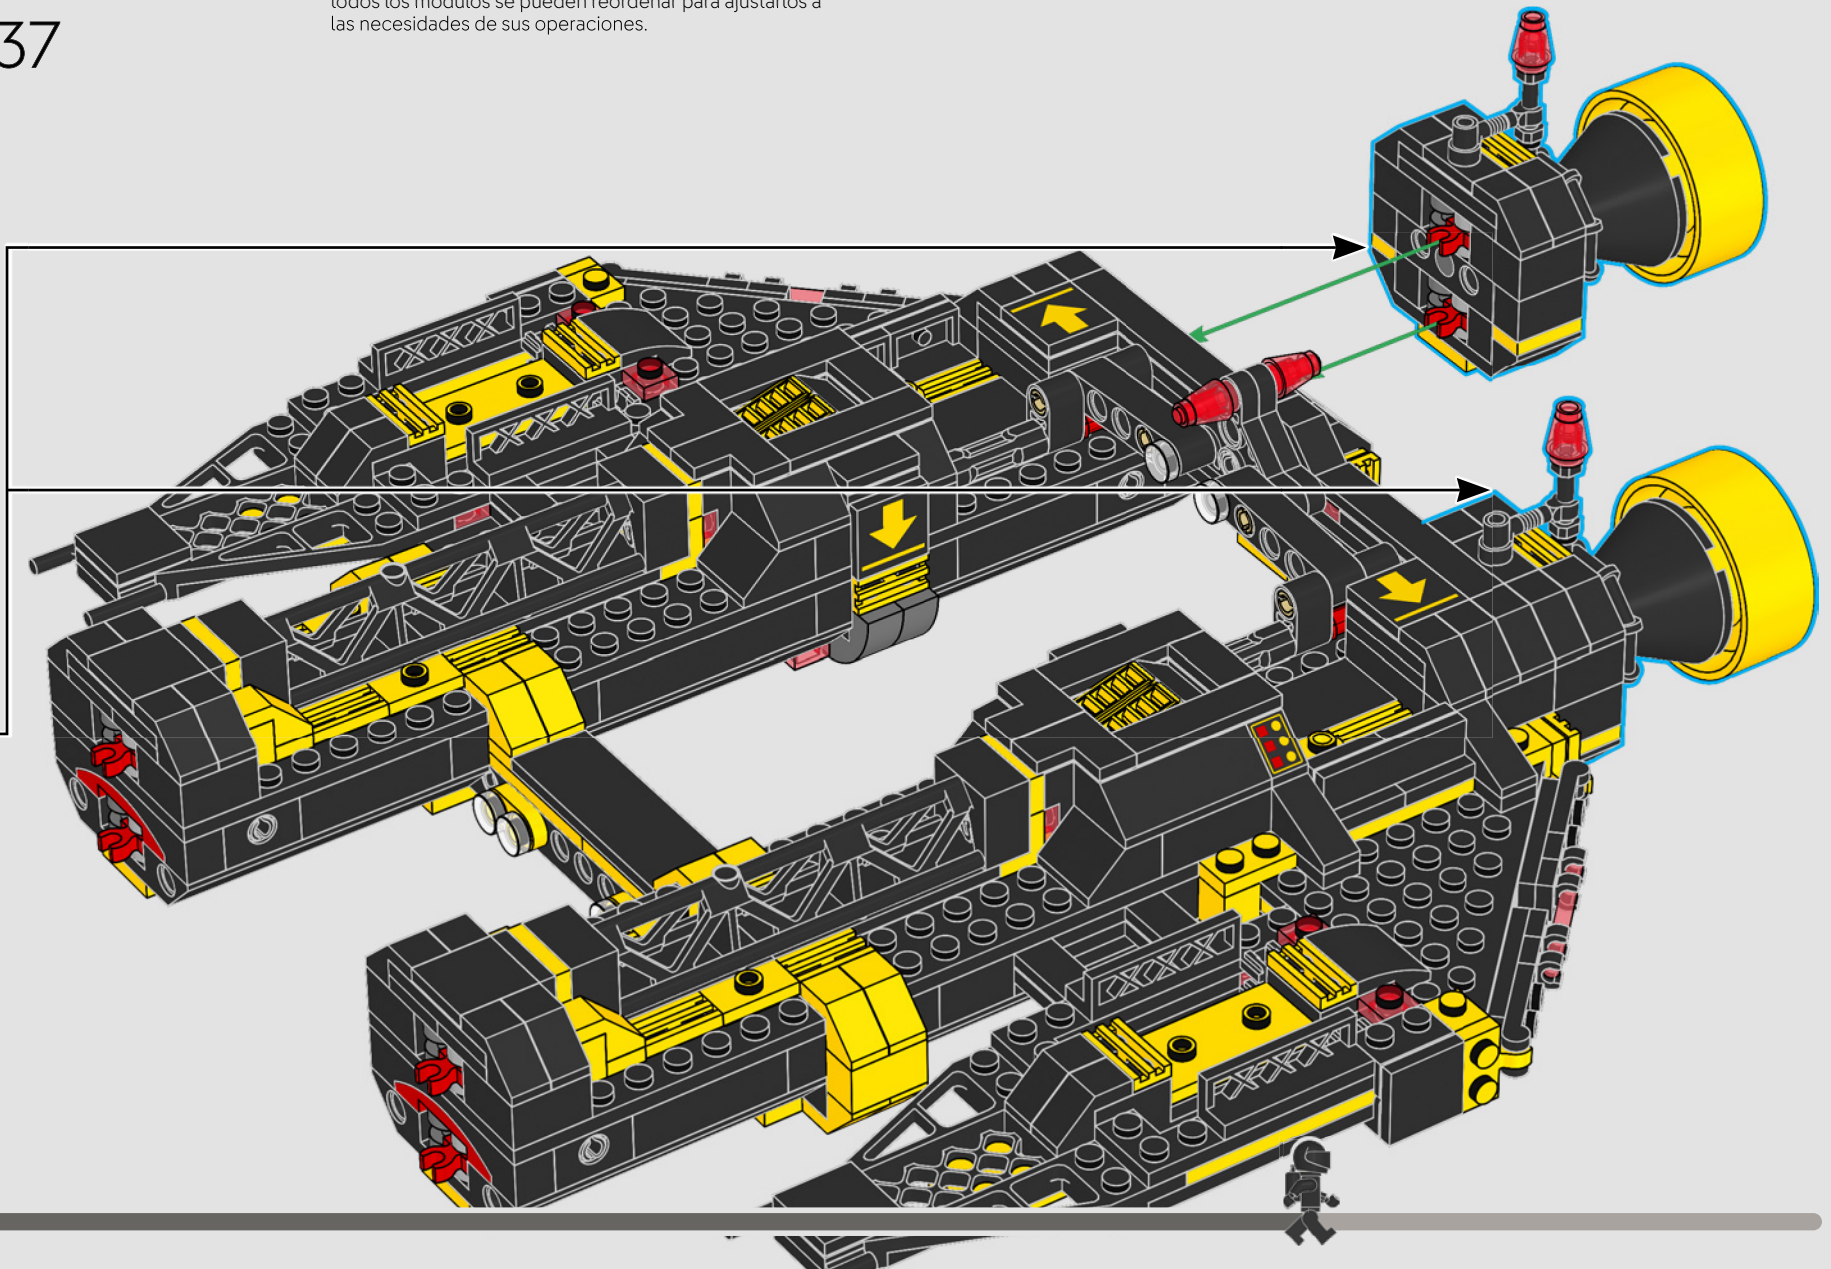

136

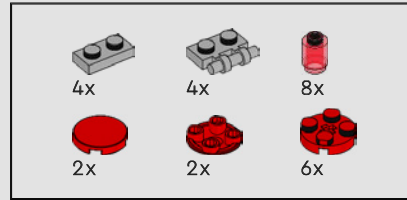

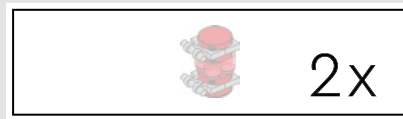

El departamento de ingeniería de Blacktron ha mejorado sustancialmente sus ingeniosos diseños modulares. Ahora, todos los módulos se pueden reordenar para ajustarlos a las necesidades de sus operaciones.

137

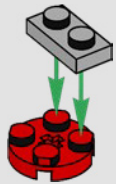

138

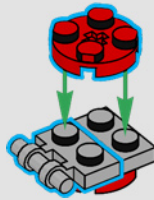

Se han incorporado cápsulas de energía activadas por fusión a los cohetes de la *Renegade* para incrementar su potencia. La *Renegade* puede alcanzar ahora las bases de Futuron de este cuadrante, que antes considerábamos seguras.

Debes permanecer en alerta máxima, incluso si la *Renegade* abandona nuestra órbita. ¡Los agentes de Blacktron tienen la capacidad de realizar misiones de espionaje trasladándose en transportes unipersonales que se ocultan bajo la insignia de Blacktron!

En esta variante de la nave, hemos detectado un ordenador notablemente más poderoso que el que llevaban las versiones anteriores. Este parece tener funciones avanzadas de localización y procesamiento de señales, así como de transmisión de vídeo.

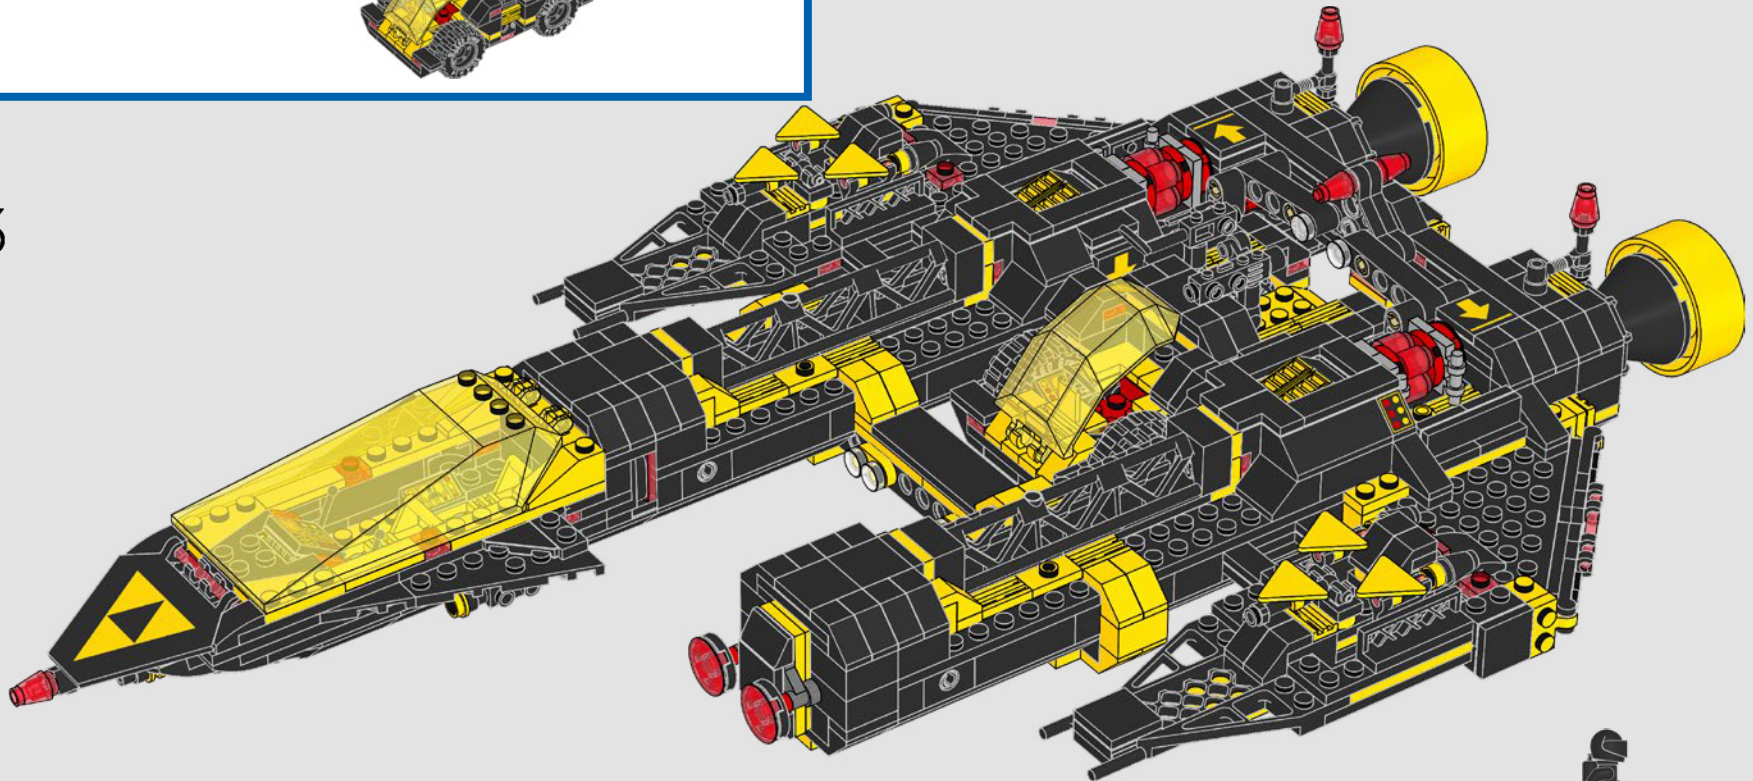

Hemos confirmado que se envían transmisiones encriptadas desde este módulo de comunicaciones a la unidad Message Intercept Base (6987). El módulo de comunicaciones puede separarse para combinarlo con el grupo de potencia posterior, dando forma a una estación remota de repetición de mensajes.

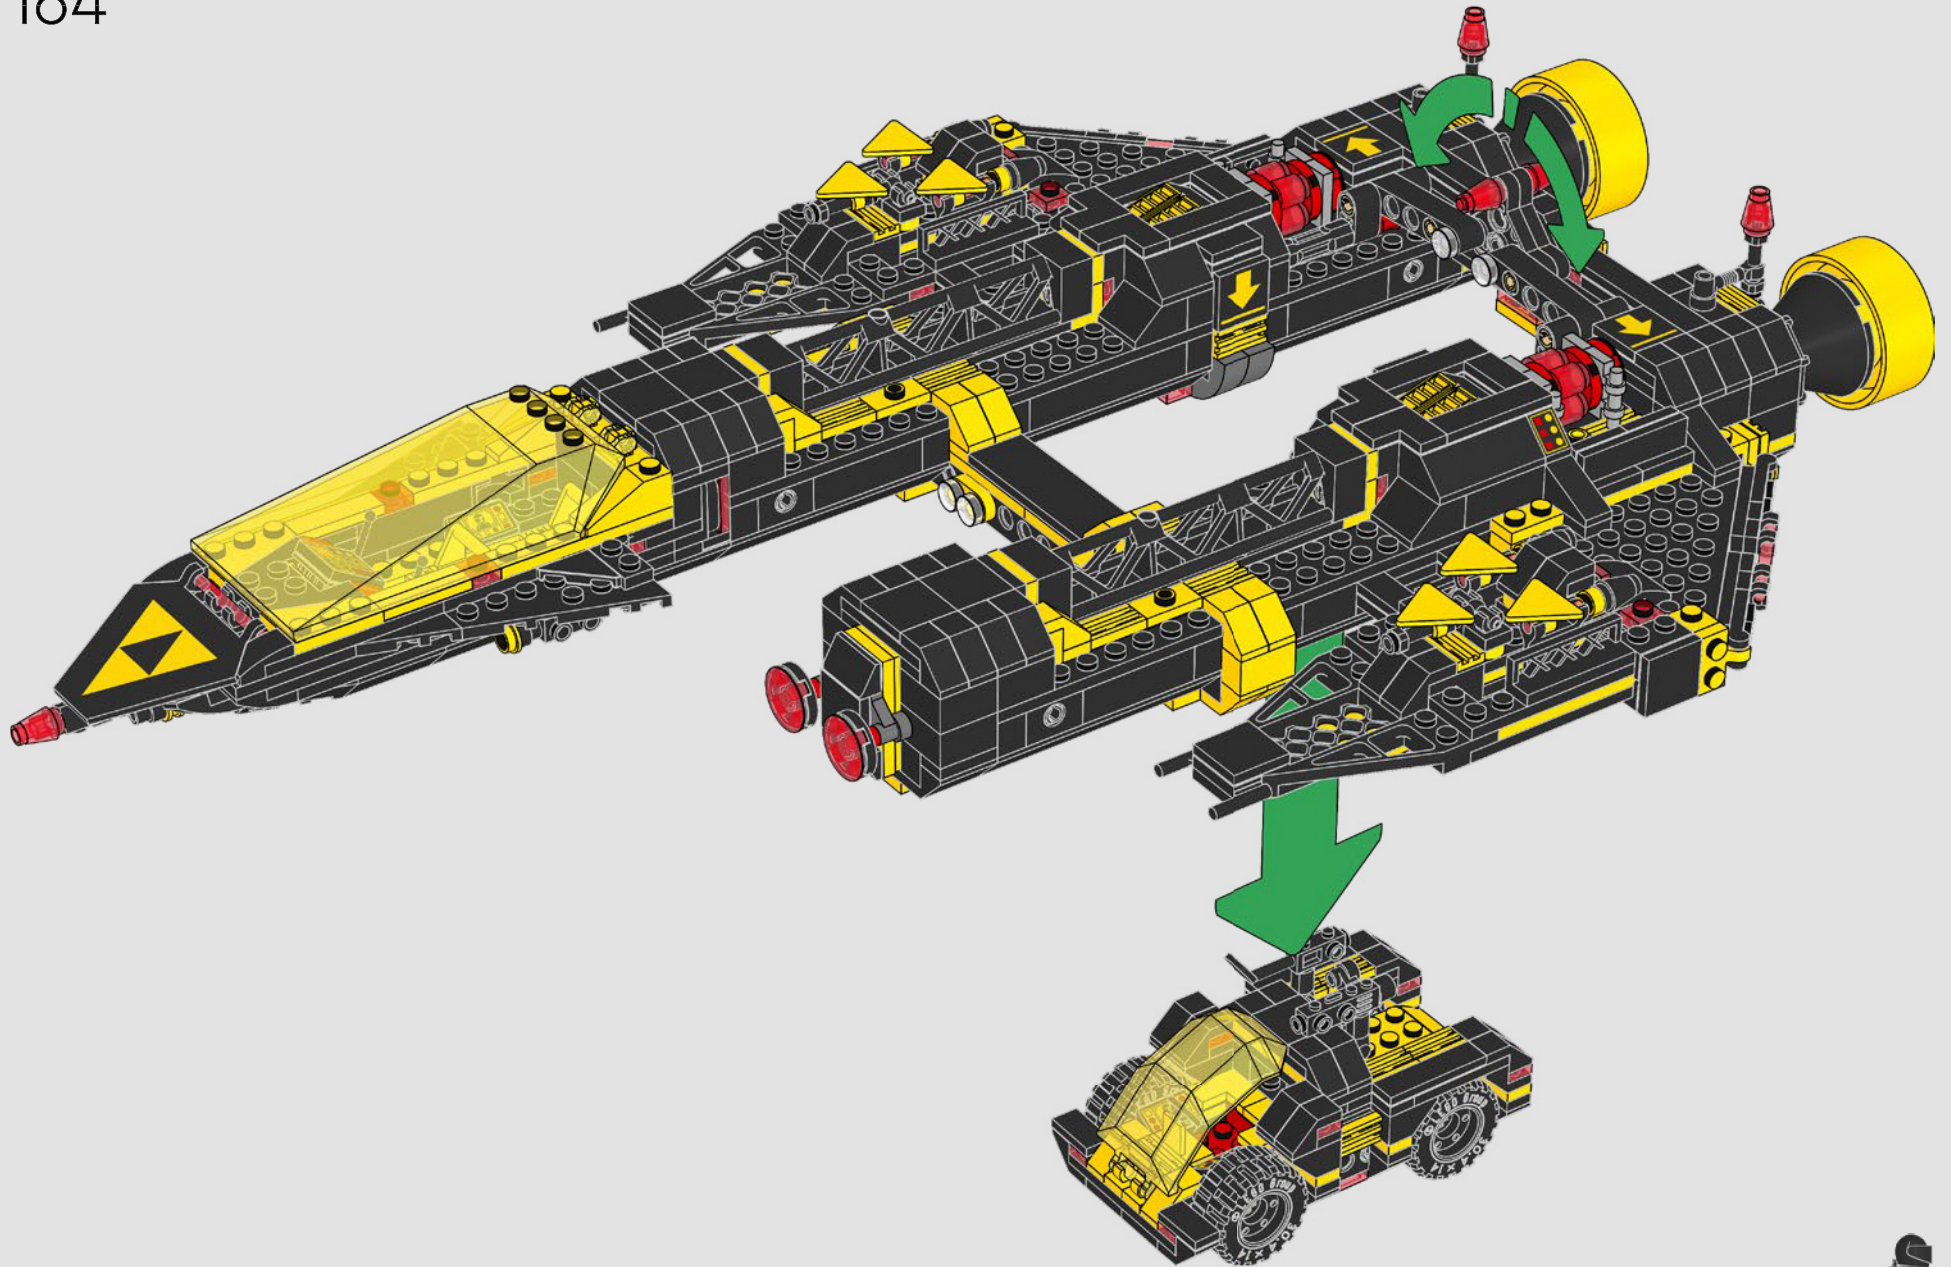

¡Advertencia! Con esta nueva tecnología de despliegue de recursos, ¡las sigilosas incursiones de las naves de Blacktron podrían ser aún más rápidas e indetectables!
