# QUANDO A ROMA / FONTANA DI TREVI

Dal suo completamento nel 1762, e attraverso i secoli, la Fontana di Trevi nella sua forma attuale ha generosamente offerto al pubblico di tutto il mondo il suo ricco patrimonio storico e architettonico. Il sito della fontana svolge da tempo un ruolo significativo nella crescita e nella prosperità della città di Roma. Dal 19 a.C., la sua acqua sorgiva naturale scorre attraverso uno dei più antichi acquedotti romani, l'Acqua Vergine.

Un'opera d'arte barocca mozzafiato, la fontana è il simbolo dell'intraprendenza romana con una ricchezza di sculture e tributi simbolici ad antiche divinità, leggende e visionari romani e all'abbondanza del mondo naturale. Il suo nome, che deriva da *tre vie*, sottolinea la sua posizione strategica all'incrocio di tre antiche strade, che un tempo erano percorse da pellegrini e cittadini e ora da circa 10 milioni di visitatori all'anno.

# IL LEGO<sup>®</sup> ARCHITECTURE DESIGN TEAM

Più che un gioiello visivo, come icona culturale la Fontana di Trevi ha ispirato innumerevoli opere d'arte, letteratura e persino film. Seguendo il popolare set Fontana di Trevi LEGO<sup>®</sup> Architecture (21020) del 2014, questa versione rivisita il sito su una scala più grande con una nuova interpretazione del vero monumento con alcuni dettagli astratti.

L'obiettivo principale era catturare l'ambiente e l'atmosfera barocca di Roma in una giornata estiva, con gli edifici dai colori vivaci che circondano la Fontana di Trevi che riflettono una luce calda sulla piazza. Le profondità all'interno della facciata proiettano ombre su se stesse e sulla vasca, creando sottili variazioni nei colori della superficie. Utilizzando tonalità di rosa, marrone chiaro, grigio e bianco, volevamo catturare l'essenza di queste intricate sfumature nell'edificio, nelle statue, nell'acqua e nelle rocce.

**Mary Wilson**  
LEGO® Architecture Designer

## PALAZZO POLI

Lo stemma di papa Clemente XII, committente della Fontana di Trevi, è affiancato da quattro statue rappresentanti frutti e messi fecondati dall'acqua.

## OCEANO (NETTUNO)

Il dio dei mari, a cavallo di un carro a forma di conchiglia trainato da mitici cavalli marini, simboleggia l'abilità ingegneristica romana nel controllo dell'acqua attraverso gli acquedotti.

## AGRIPPA

*Il generale e architetto romano Marco Vipsanio Agrippa (63-12 a.C.) viene ritratto mentre approva i piani per la costruzione dell'acquedotto originale.*

## LA VERGINE

*Un omaggio alla fanciulla che, secondo il mito, millenni fa indicò la sorgente ai soldati romani.*

## SALUBRITÀ (SALUS)

*La dea della salute tiene una coppa per permettere a un serpente di bere, simboleggiando la purezza e i poteri curativi dell'acqua.*

## ABBONDANZA

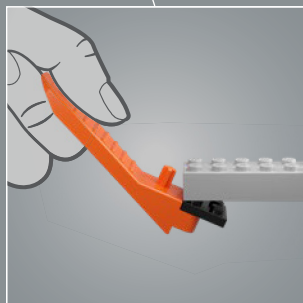

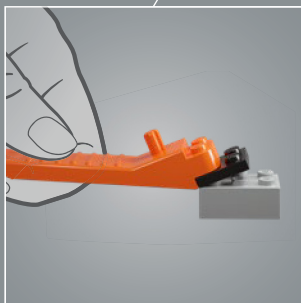

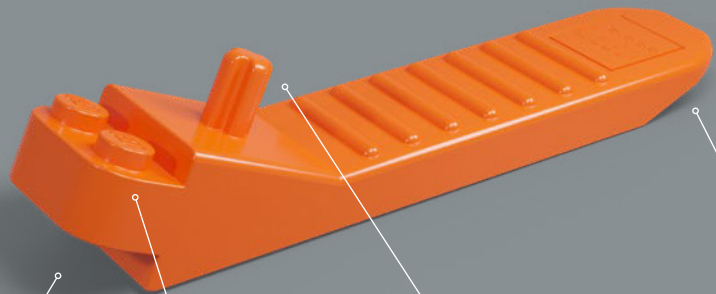

*La dea dell'abbondanza versa l'acqua da una grande urna, che simboleggia il flusso dell'acqua proveniente dagli acquedotti e la fertilità che apporta alla terra.*

## TRITONI

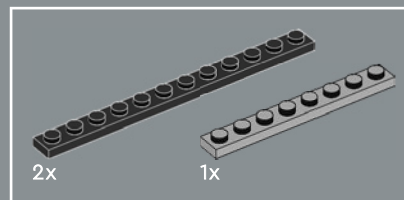

*Mitiche creature marine metà uomo metà pesce. Il primo lotta per controllare un agitatissimo cavallo marino (la natura turbolenta del mare), il secondo guida un cavallo più calmo (le acque sotto il controllo romano).*

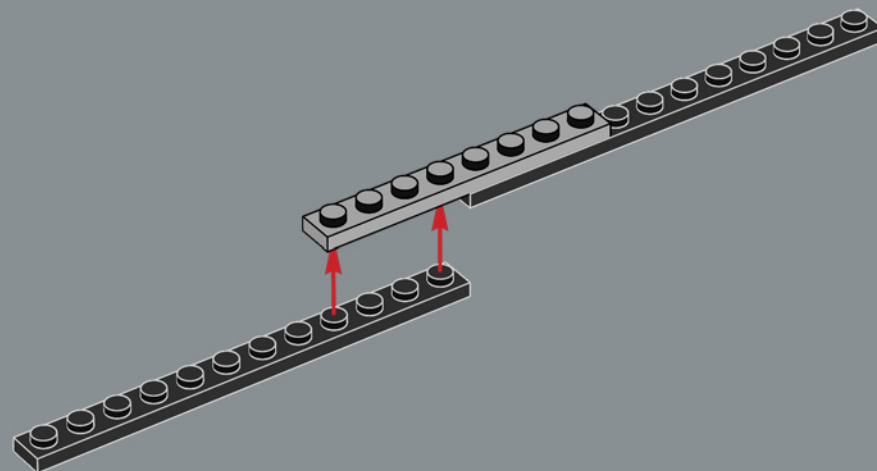

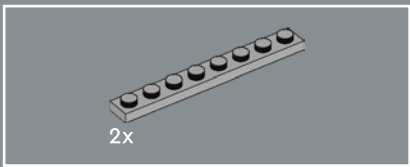

La costruzione della Fontana di Trevi, progettata da Nicola Salvi, ha richiesto 30 anni e fu completata dall'amico di Salvi, lo scultore Pietro Bracci, nel 1762, 11 anni dopo la sua morte.

Nel corso dei secoli le "tre vie" che hanno portato e ispirato il nome della Fontana di Trevi si sono ampliate. Cinque strade conducono ora alla famosa piazza.

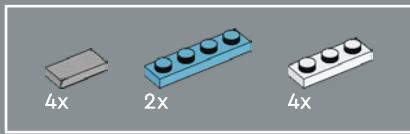

14

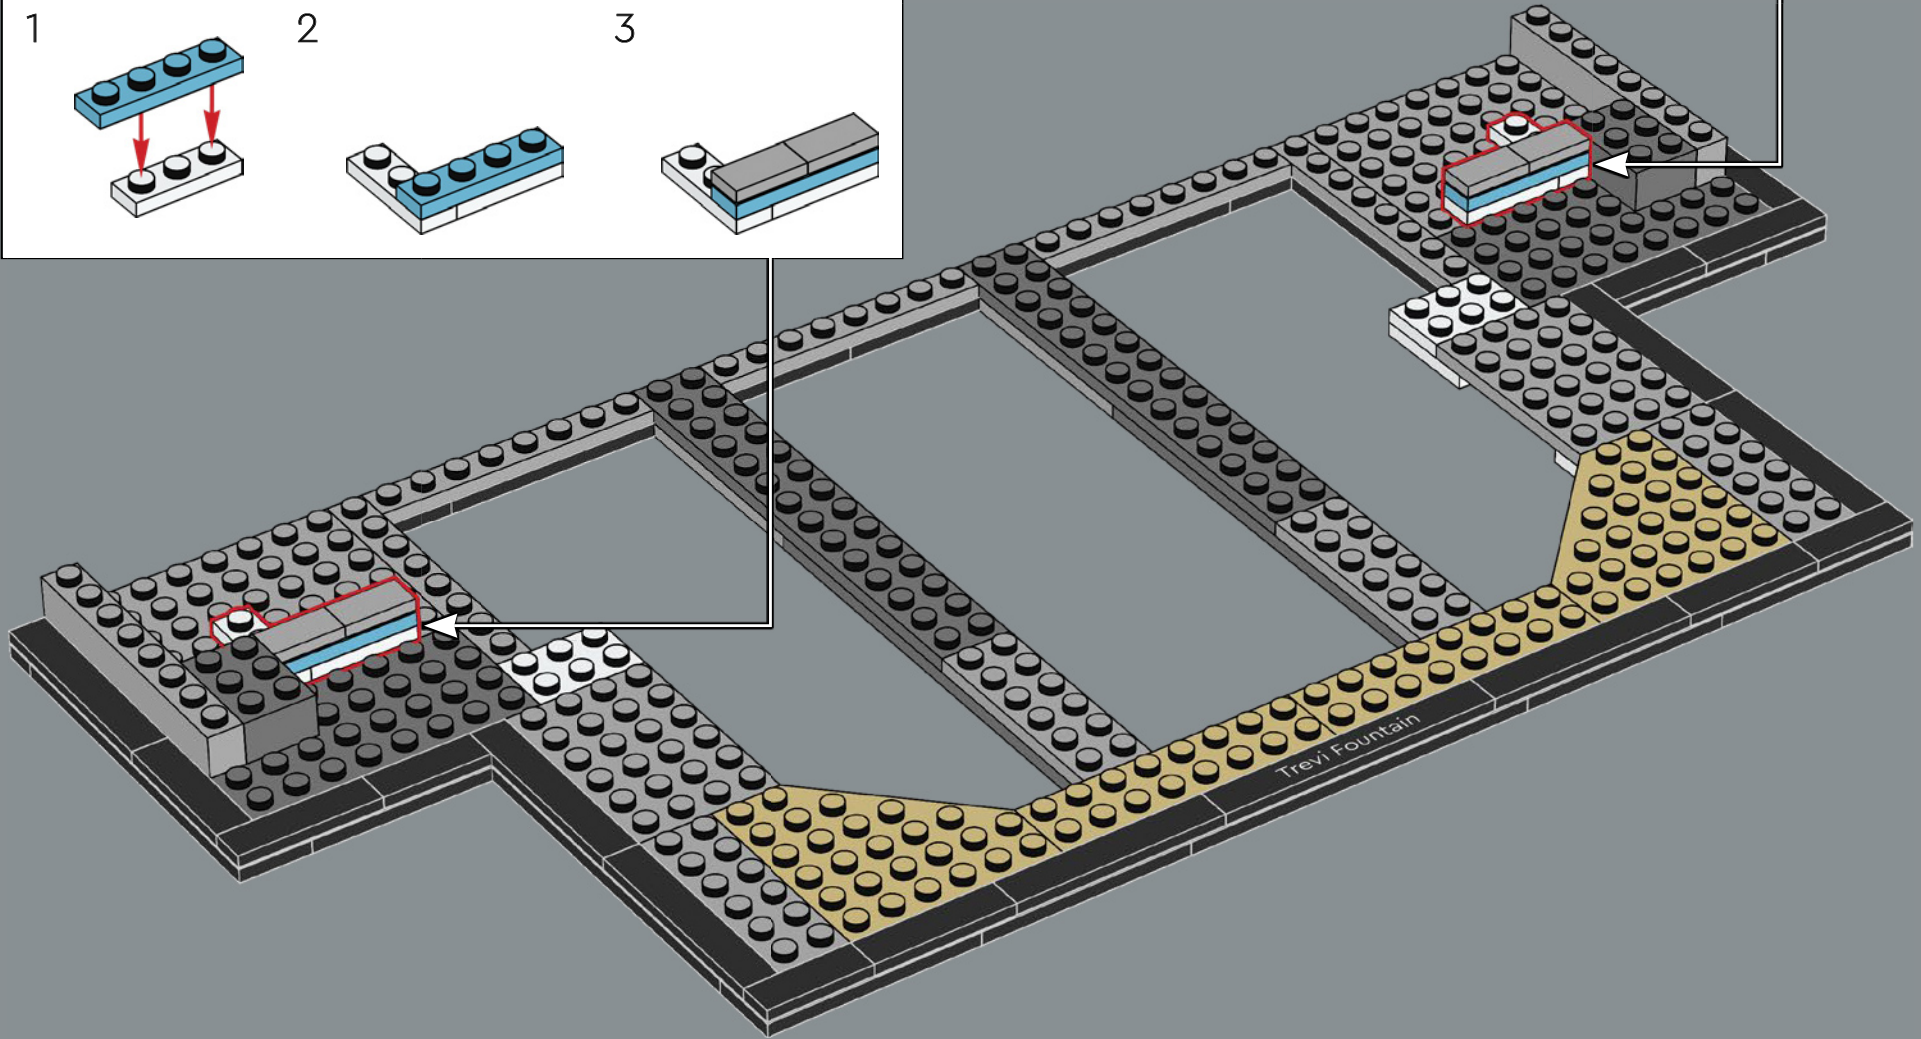

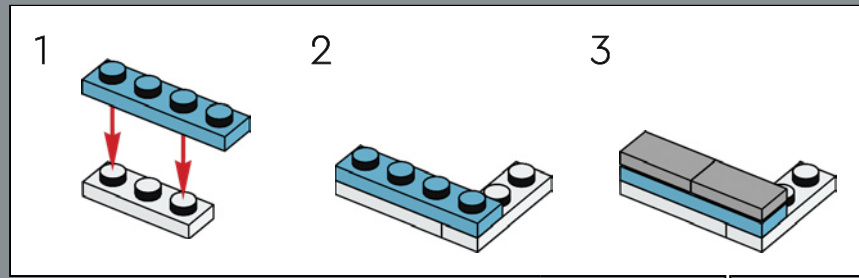

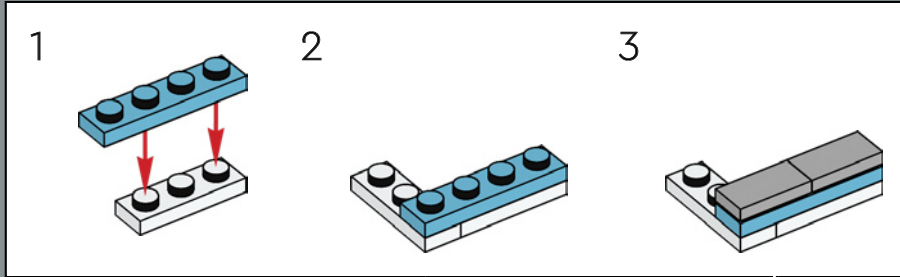

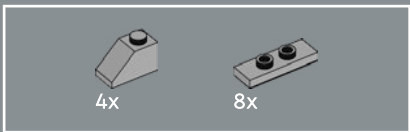

15

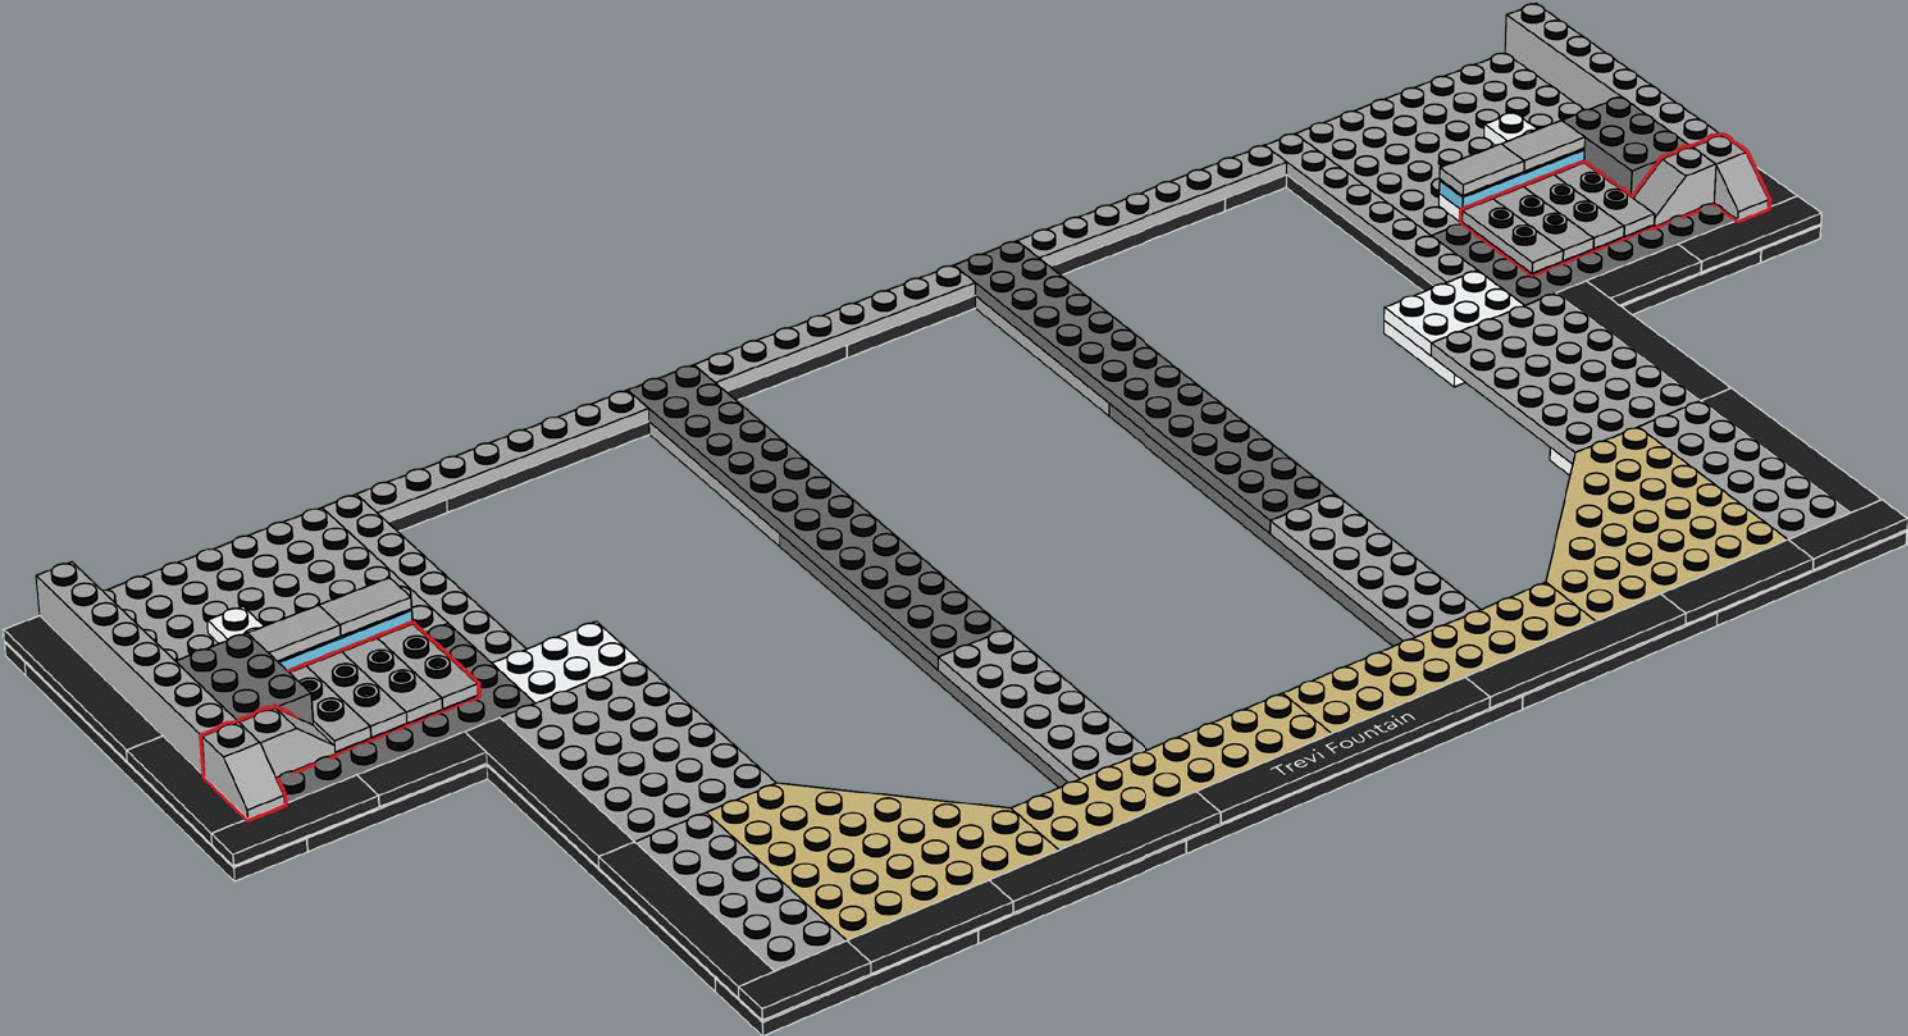

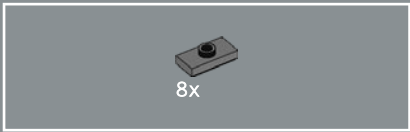

16

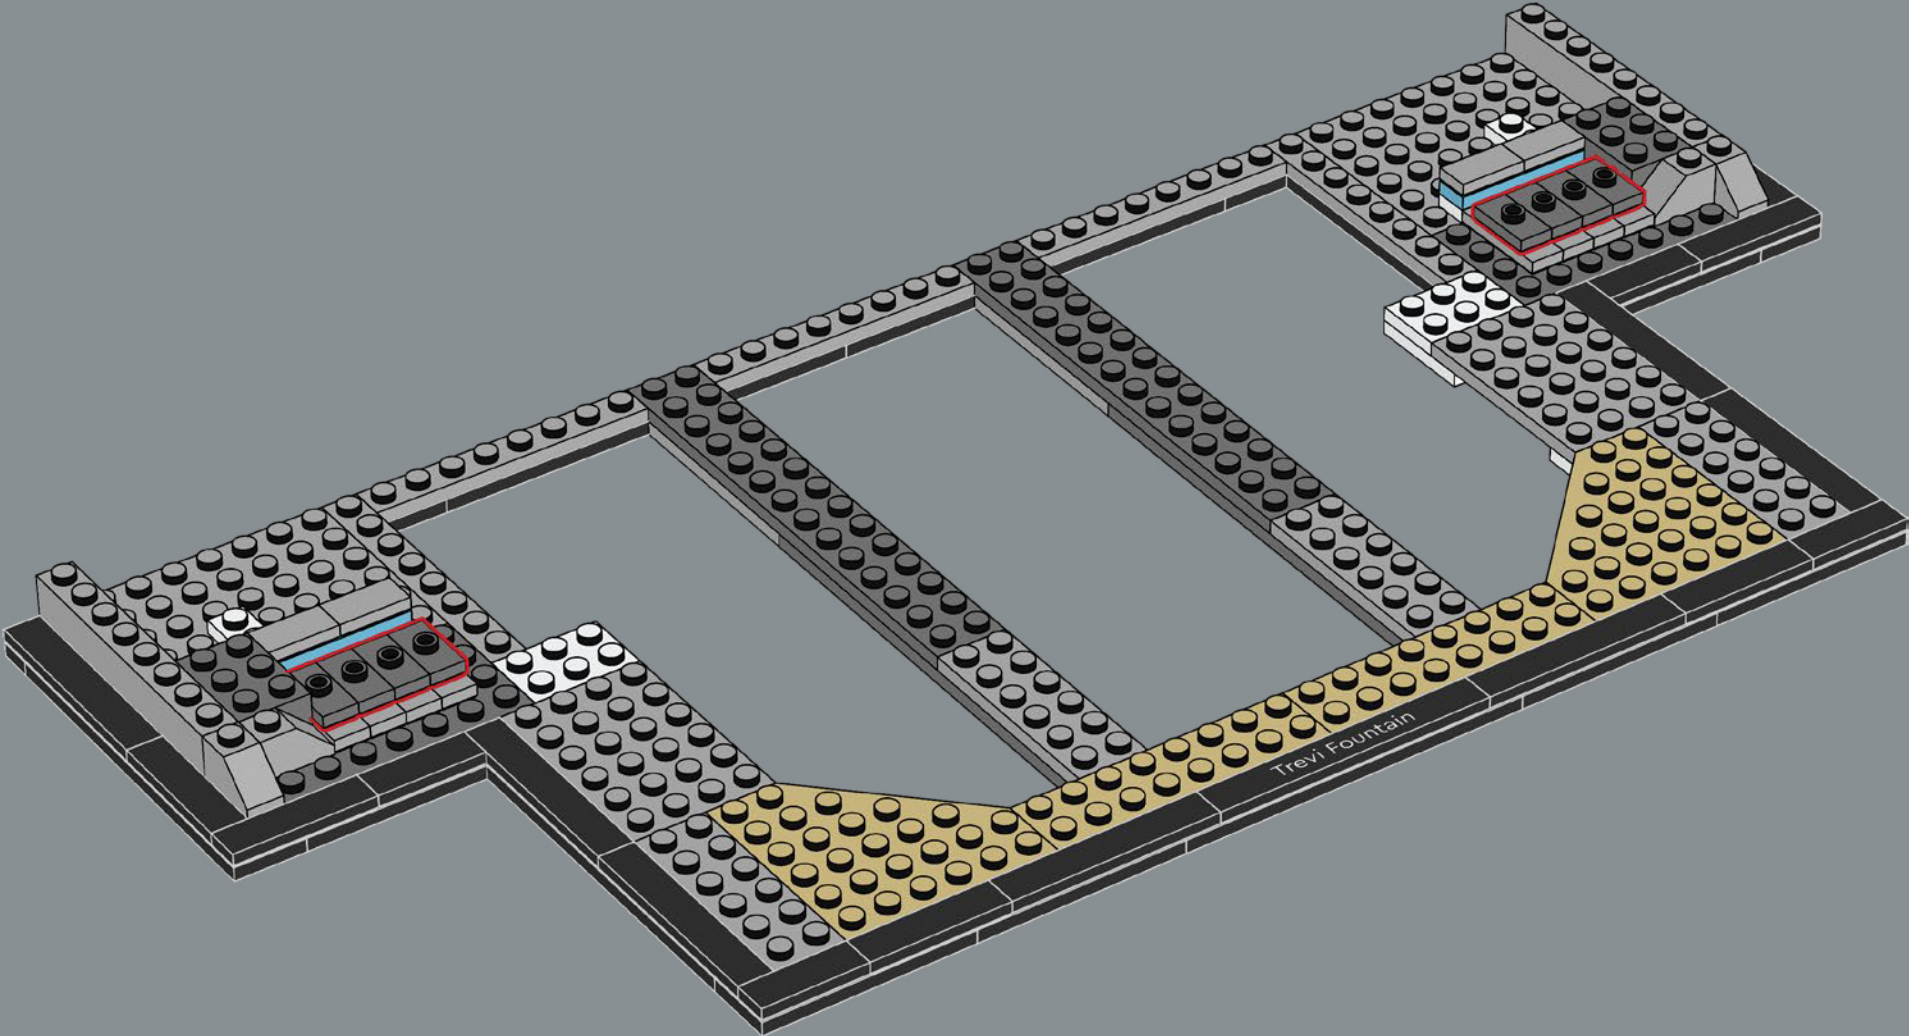

17

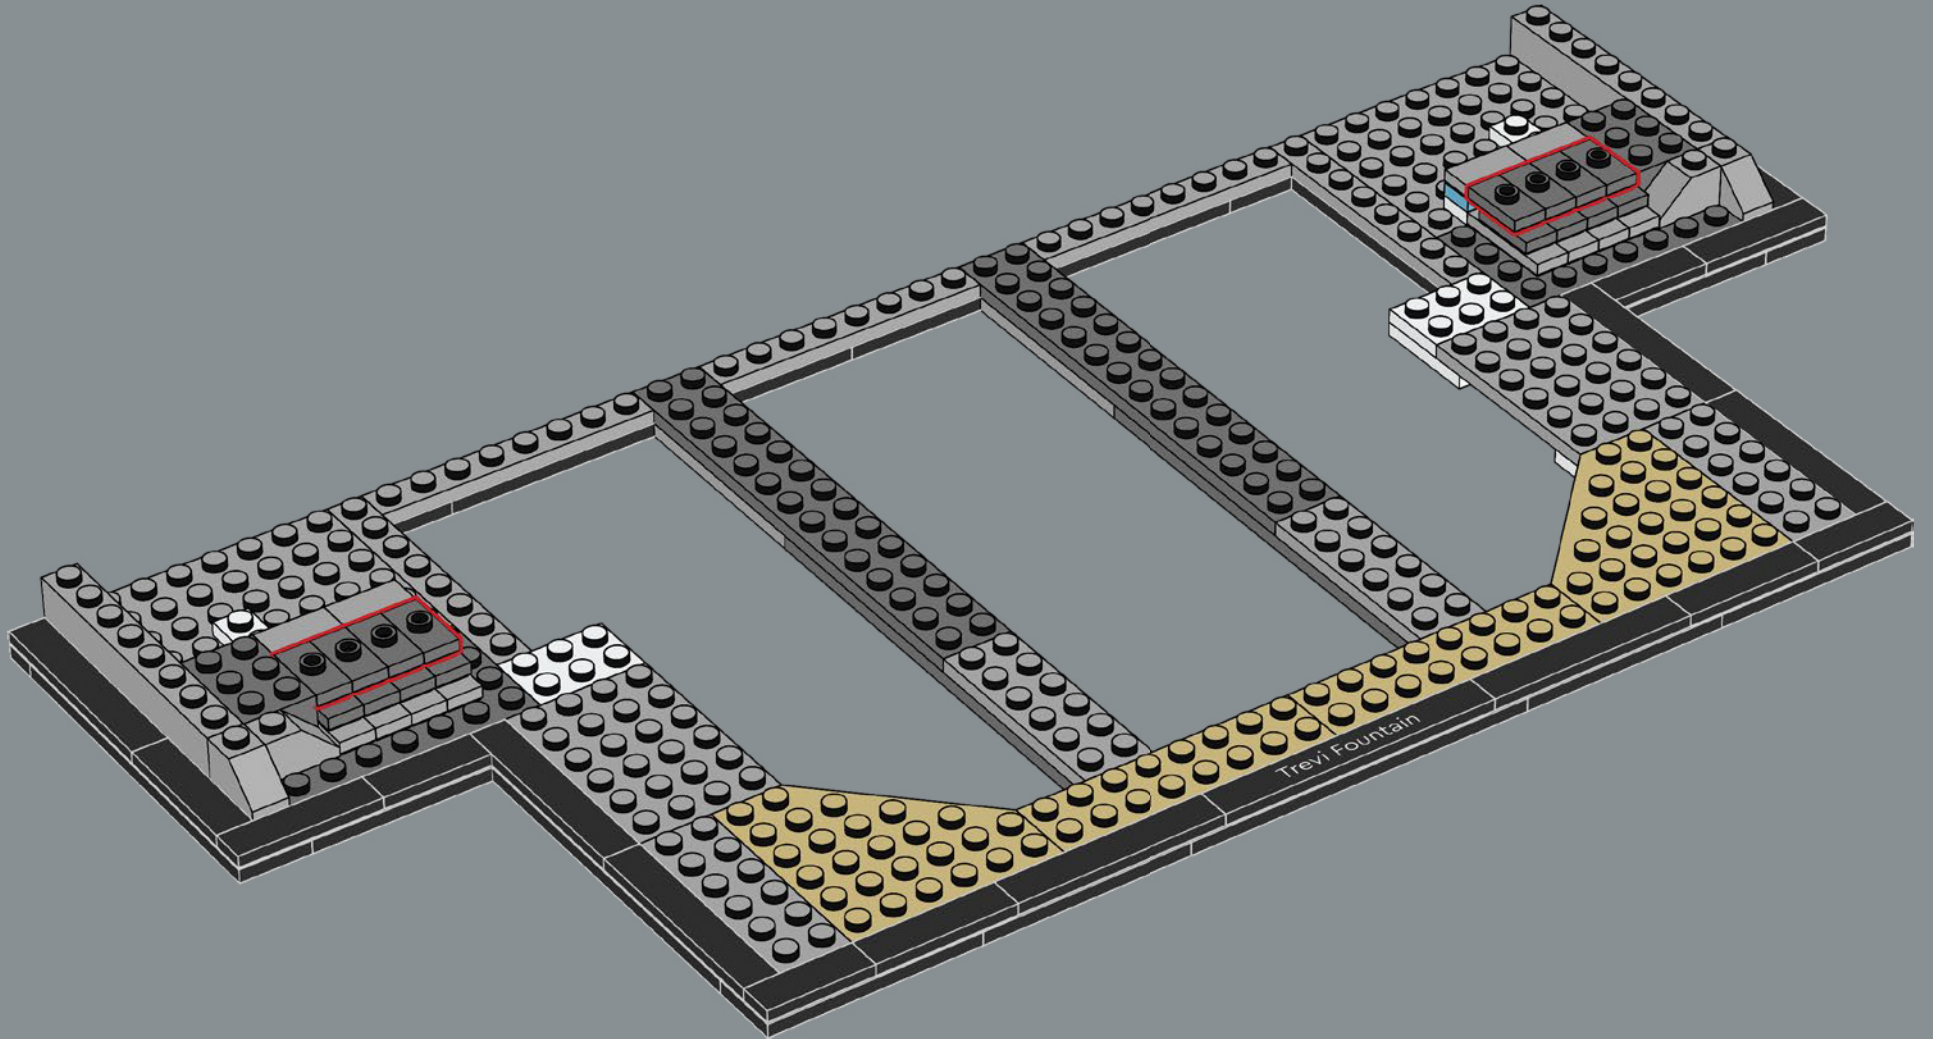

18

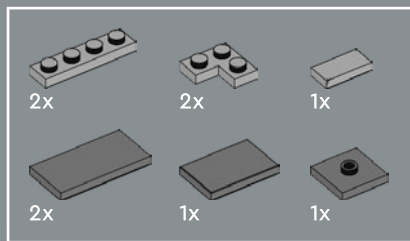

8x

19

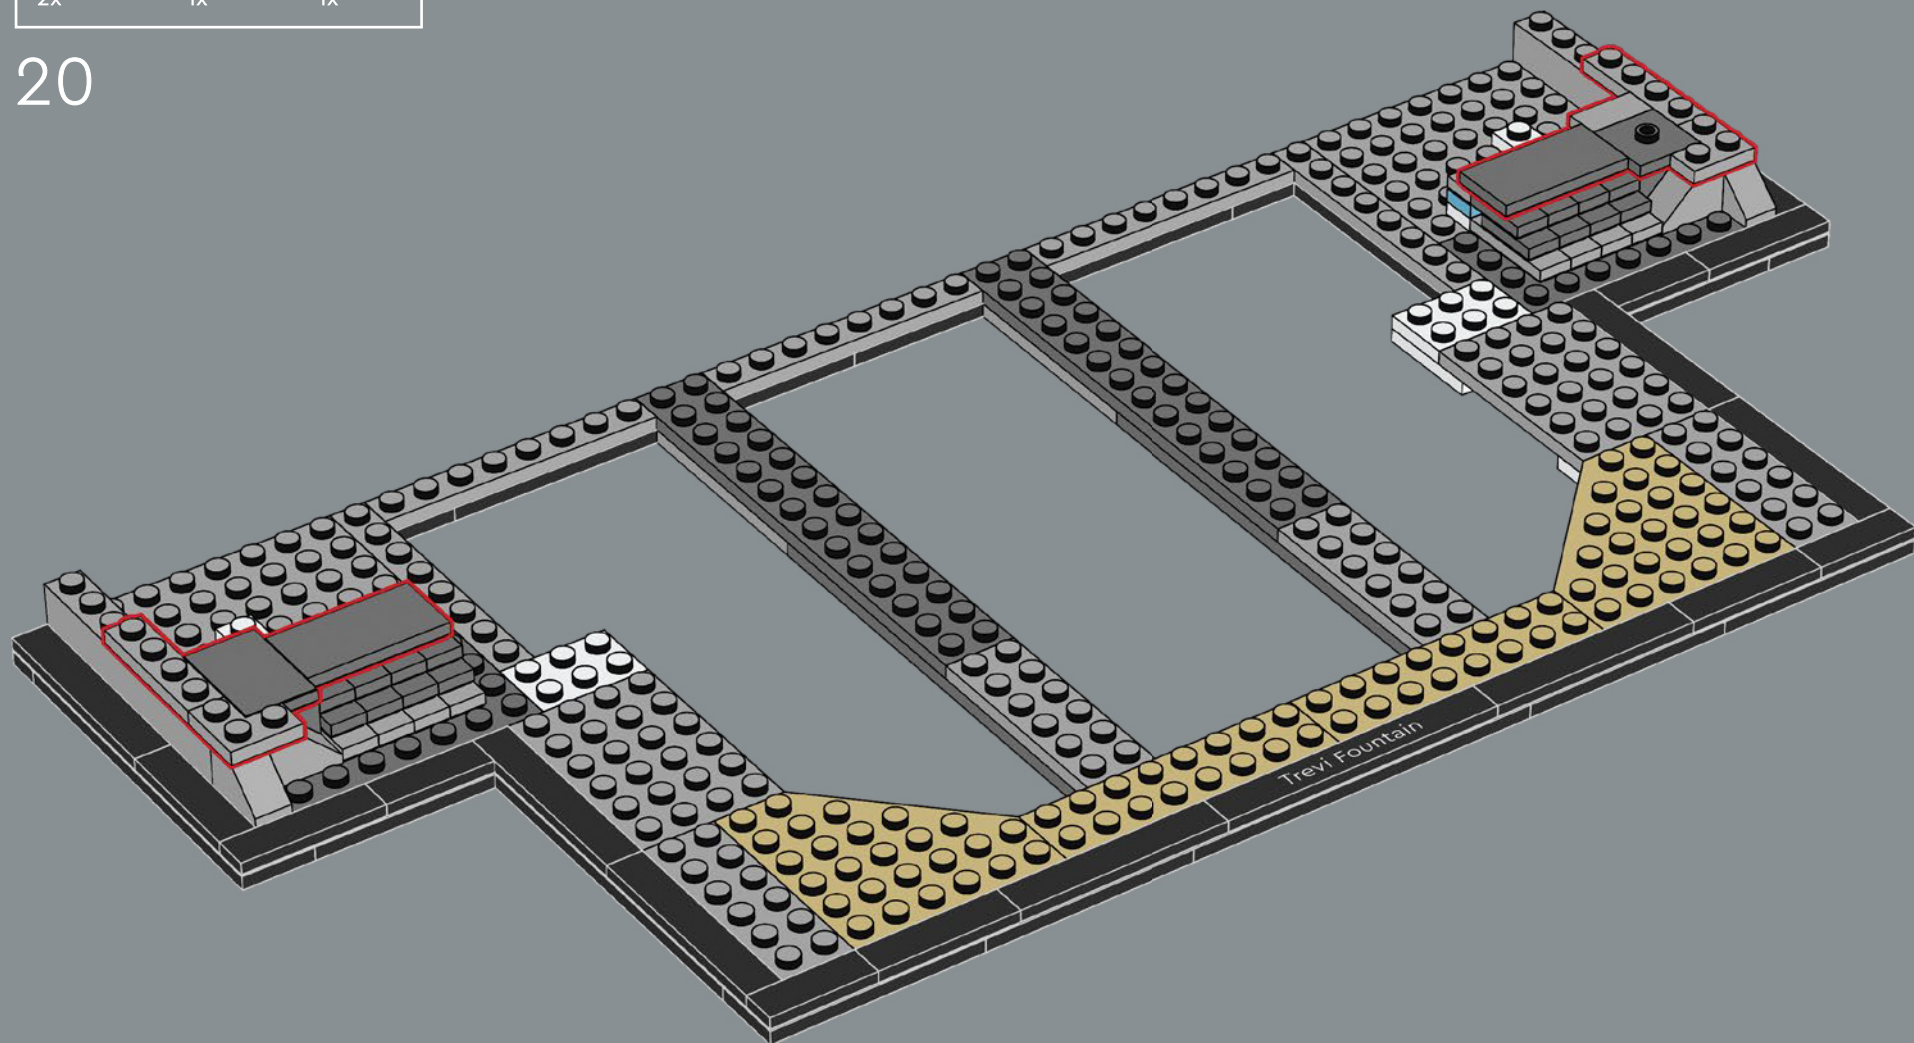

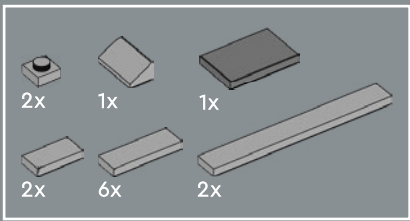

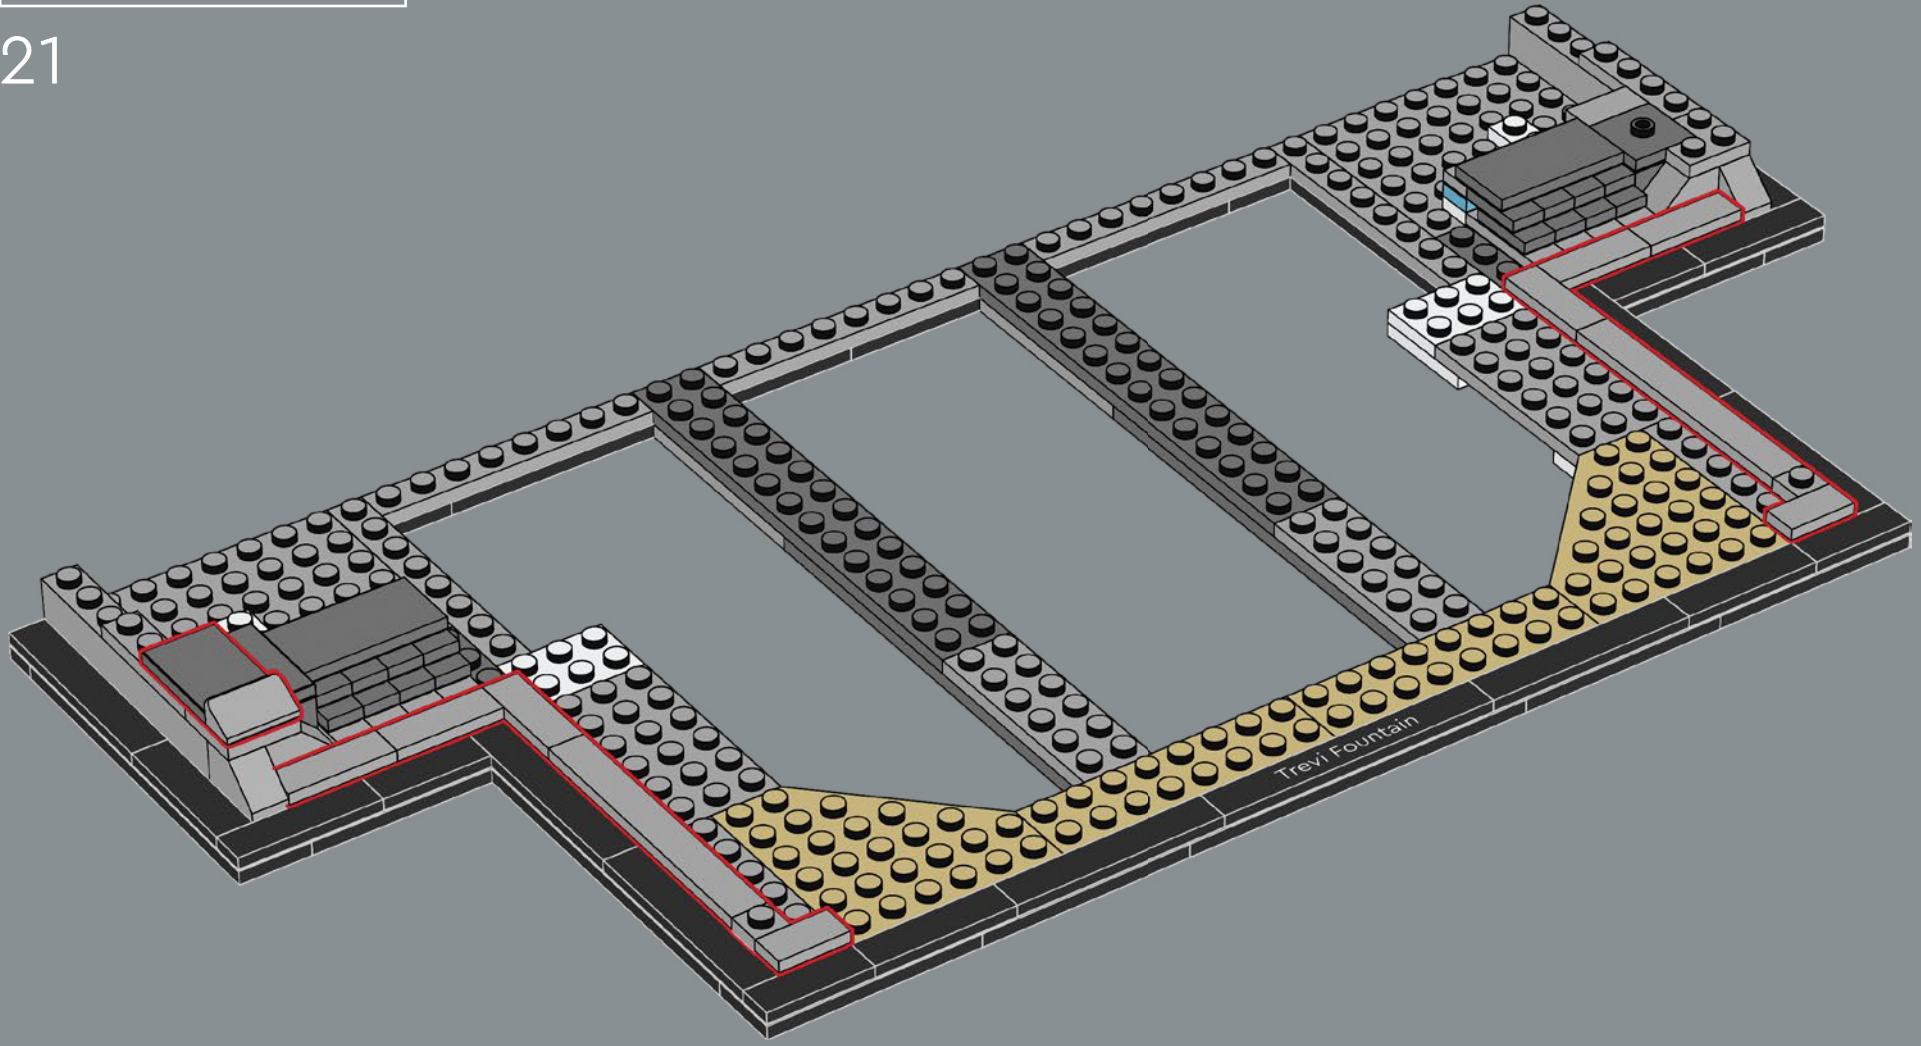

L'enorme quantità di traffico pedonale verso il monumento contribuisce anche al graduale scolorimento della pavimentazione, dei gradini e della strato in roccia inferiore.

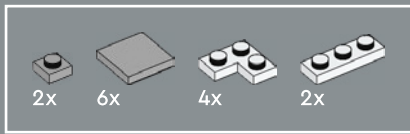

20

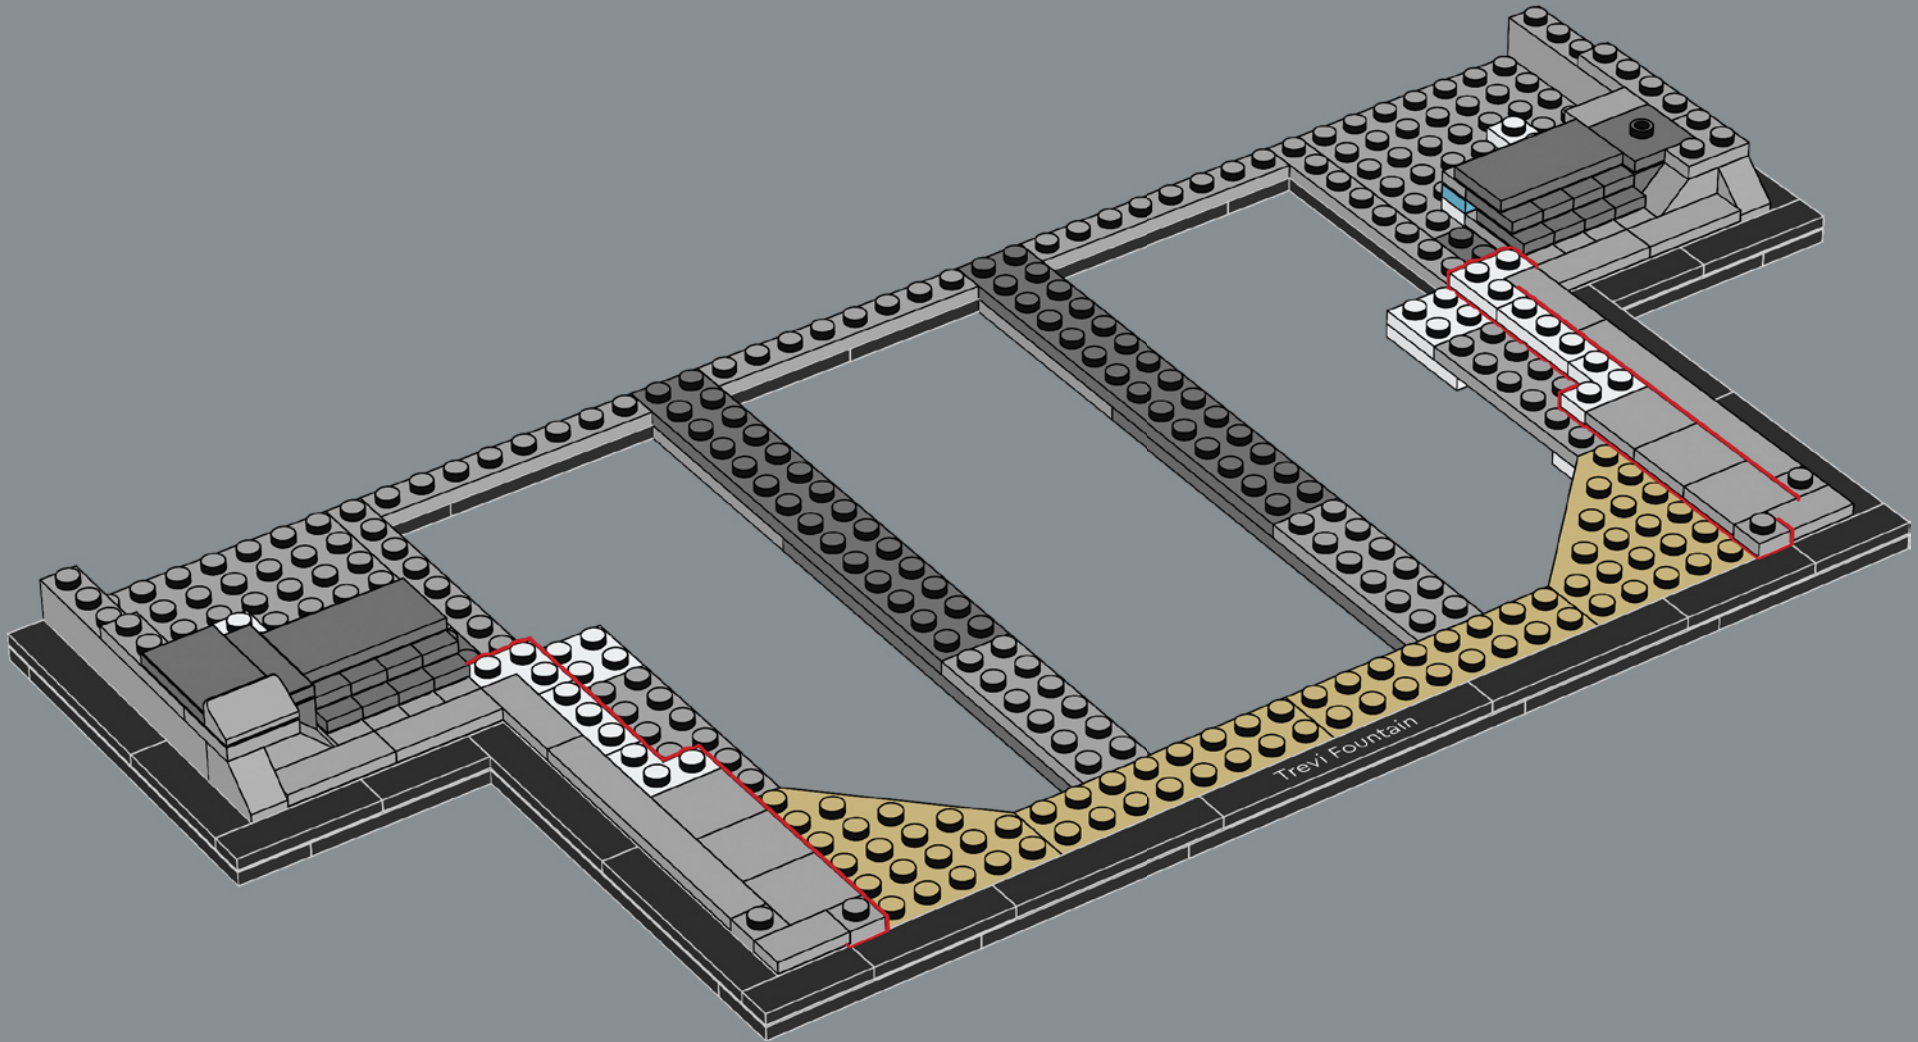

21

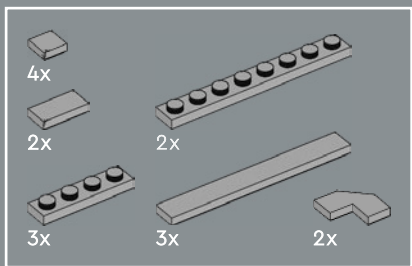

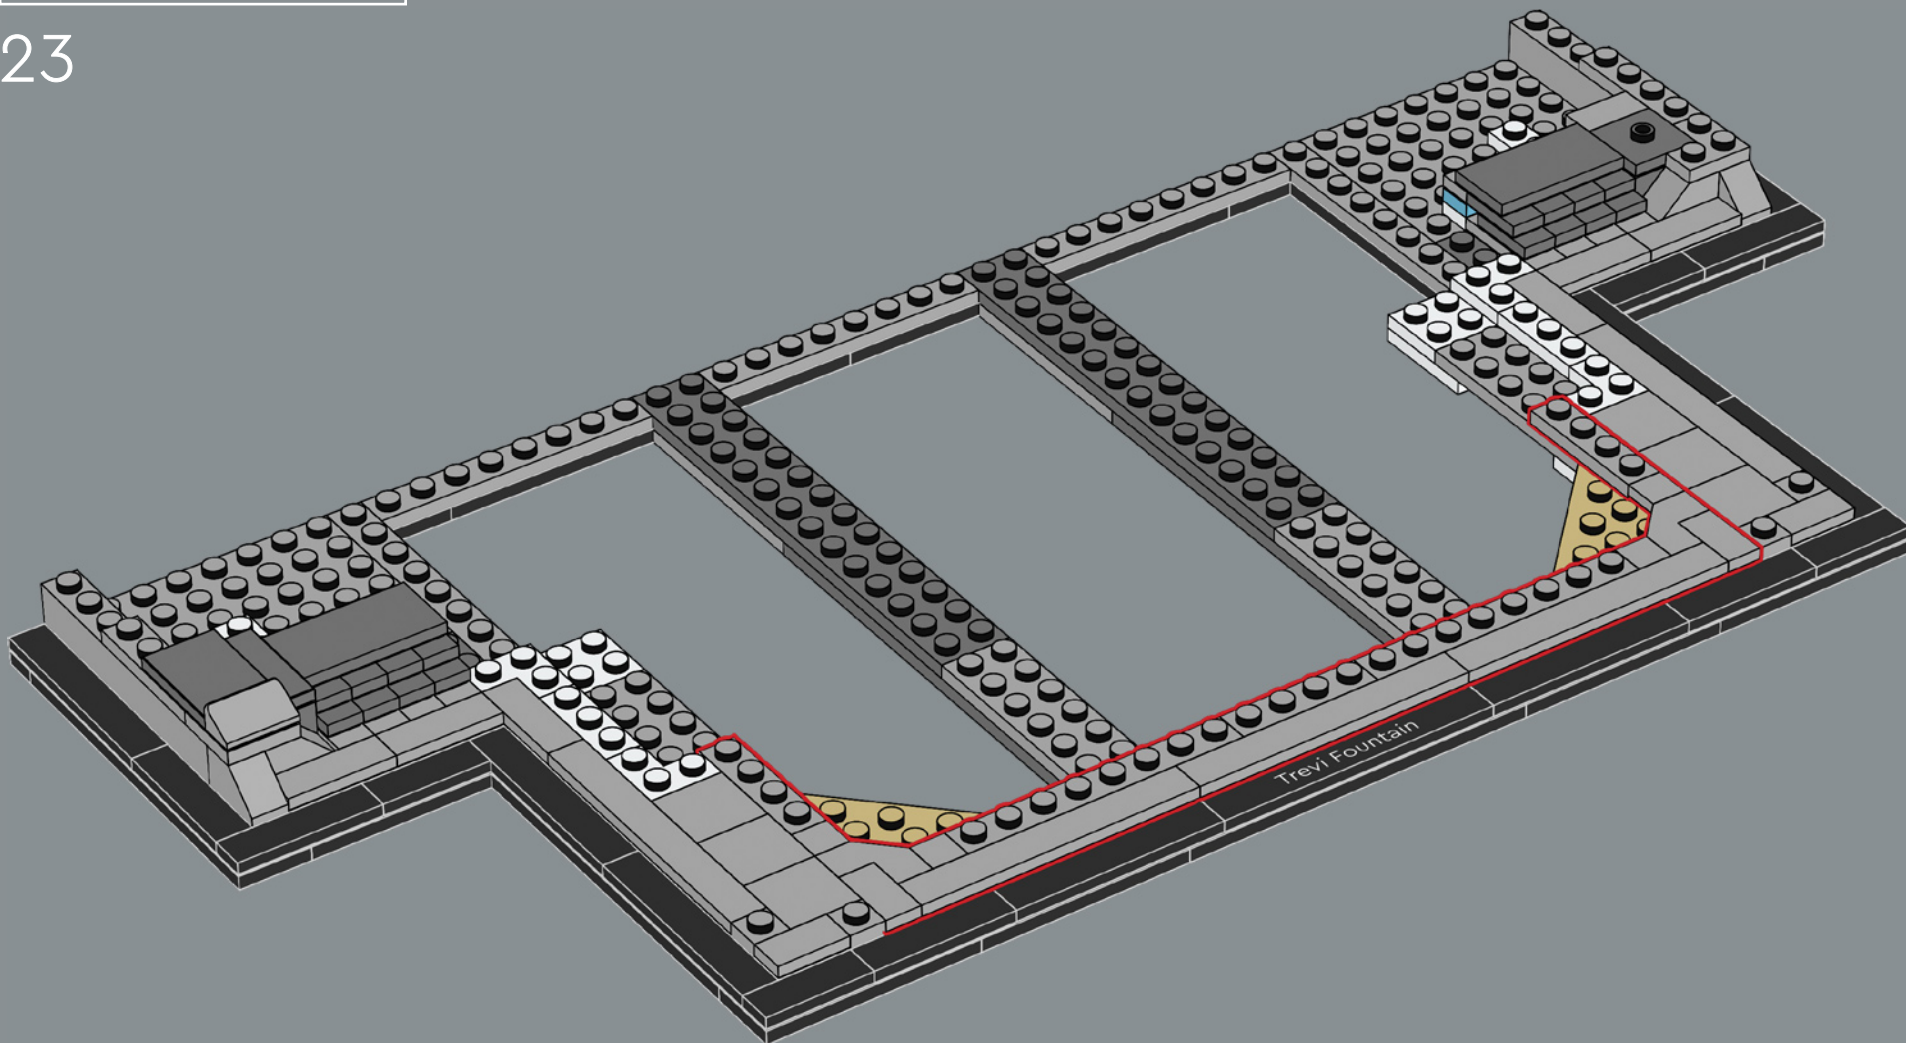

22

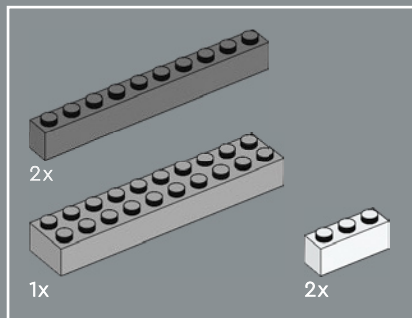

La Piazza di Trevi ospita ogni anno circa 10 milioni di visitatori, rendendola una delle mete turistiche più apprezzate in Italia.

Una leggenda locale dice che chi getta una moneta nella fontana tornerà a Roma. Due monete e ti innamorerai di una persona che incontrerai alla fontana, e se offri tre monete, potreste stare insieme per sempre!

Il colore sotto il blu trasparente riflette quello reale. Nelle porzioni superiori, l'acqua scorre sulla roccia, evidenziando il colore della pietra sottostante, ma più in basso nella vasca, la profondità è indicata con sfumature di blu più scure.

Le parti in roccia sono uno dei pochi dettagli che sconvolge la simmetria complessiva della struttura barocca, aggiungendo allo stesso tempo uno straordinario contrasto con il resto della facciata con le sue forme organiche.

137

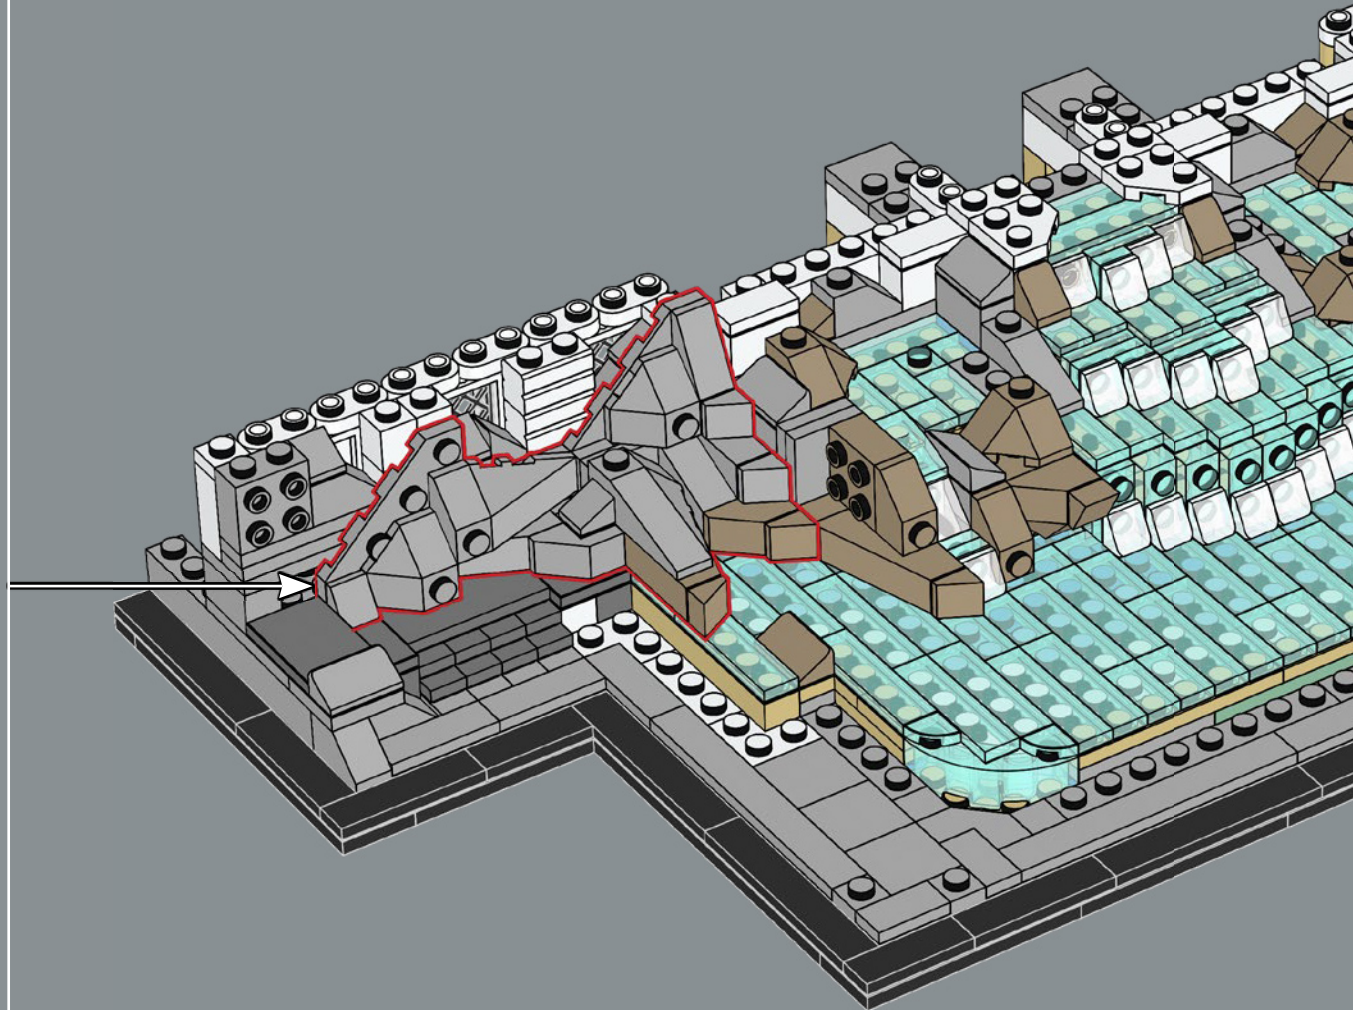

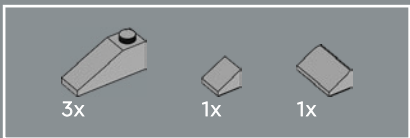

138

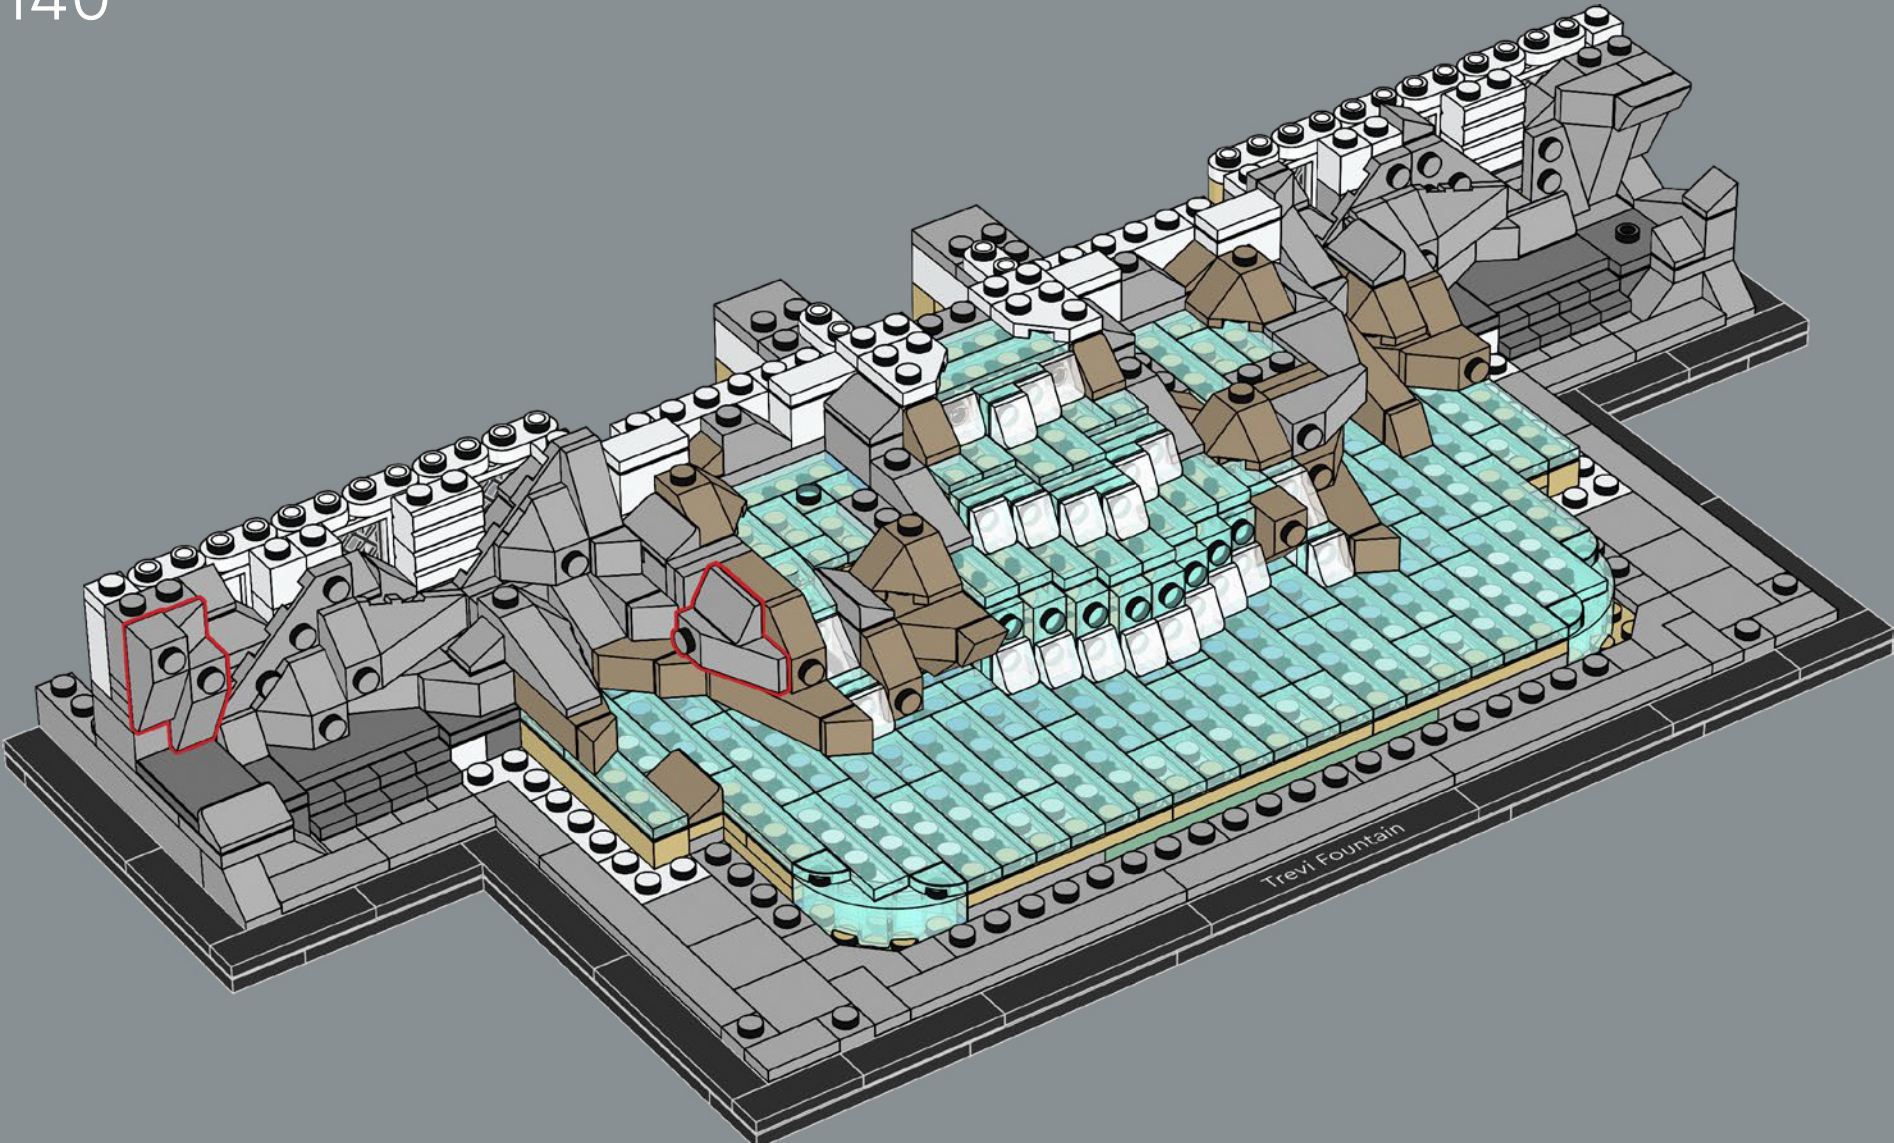

139

Persino l'usura della fontana gioca un ruolo nel modo in cui viene ammirata. Un certo degrado ambientale è presente negli angoli e nelle fessure della facciata scolpita, lasciando incisioni anche superficiali di colore più scuro rispetto alla roccia circostante.

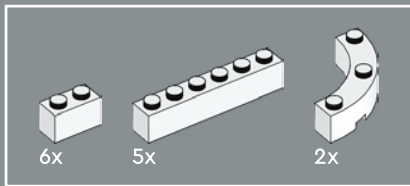

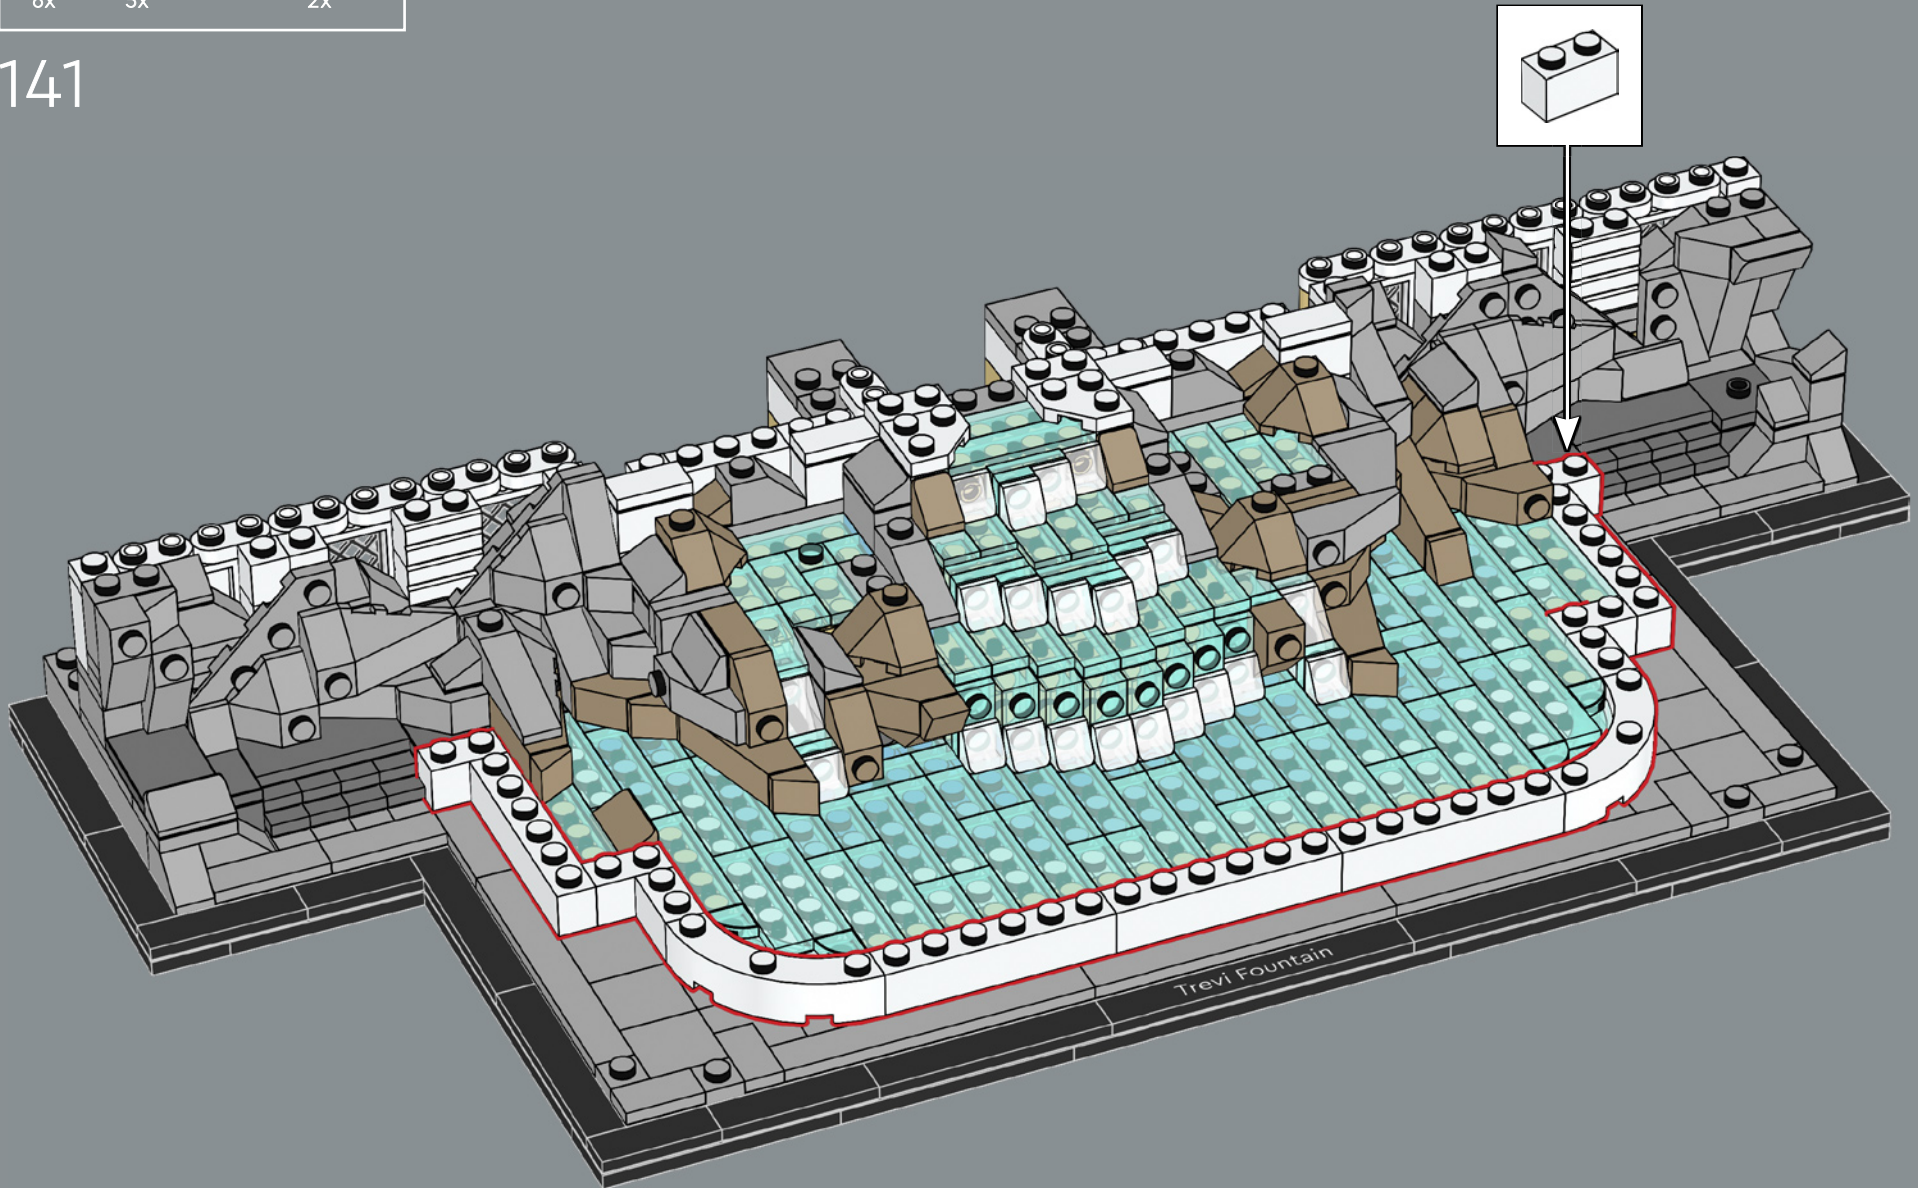

140

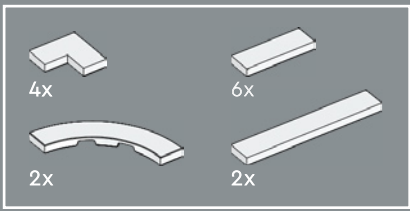

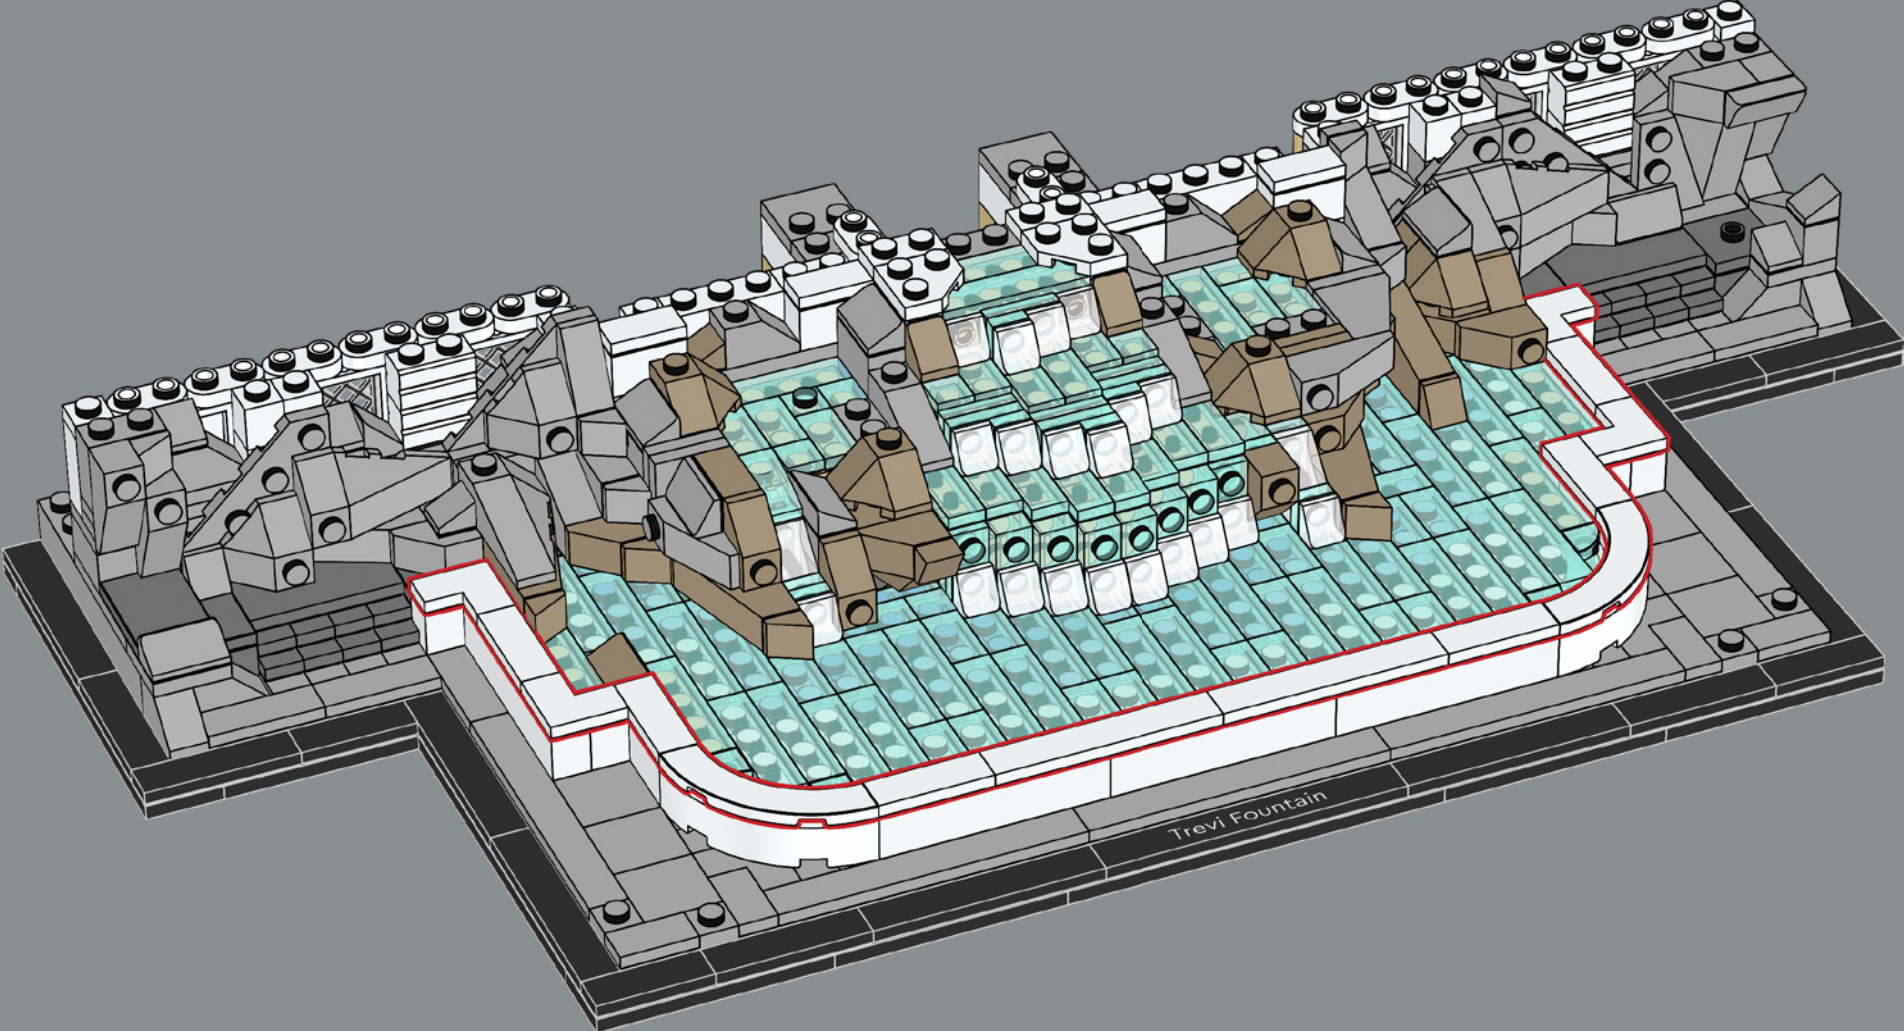

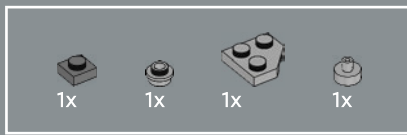

141

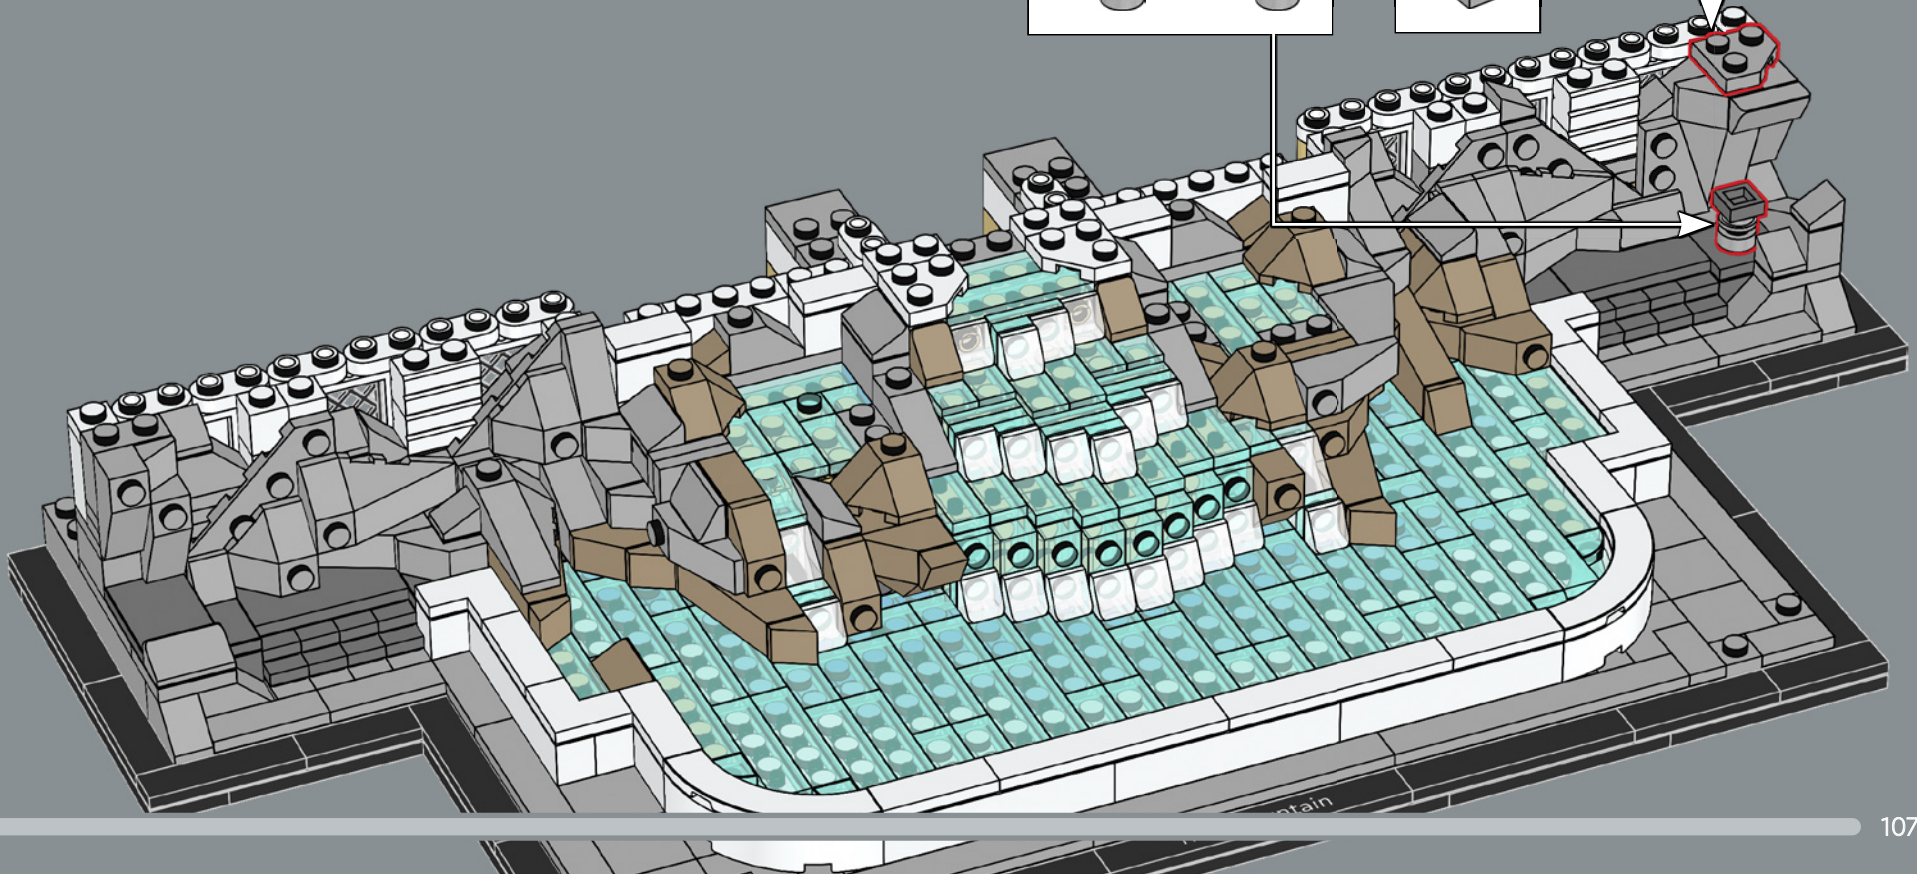

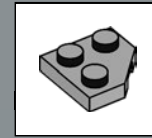

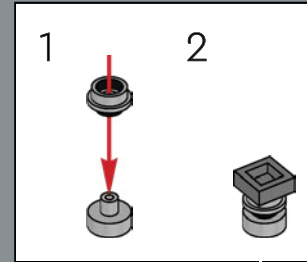

142

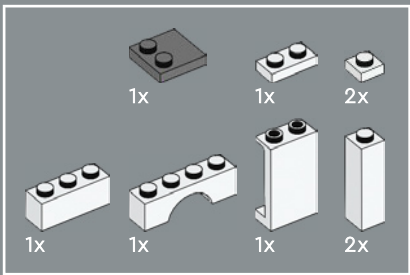

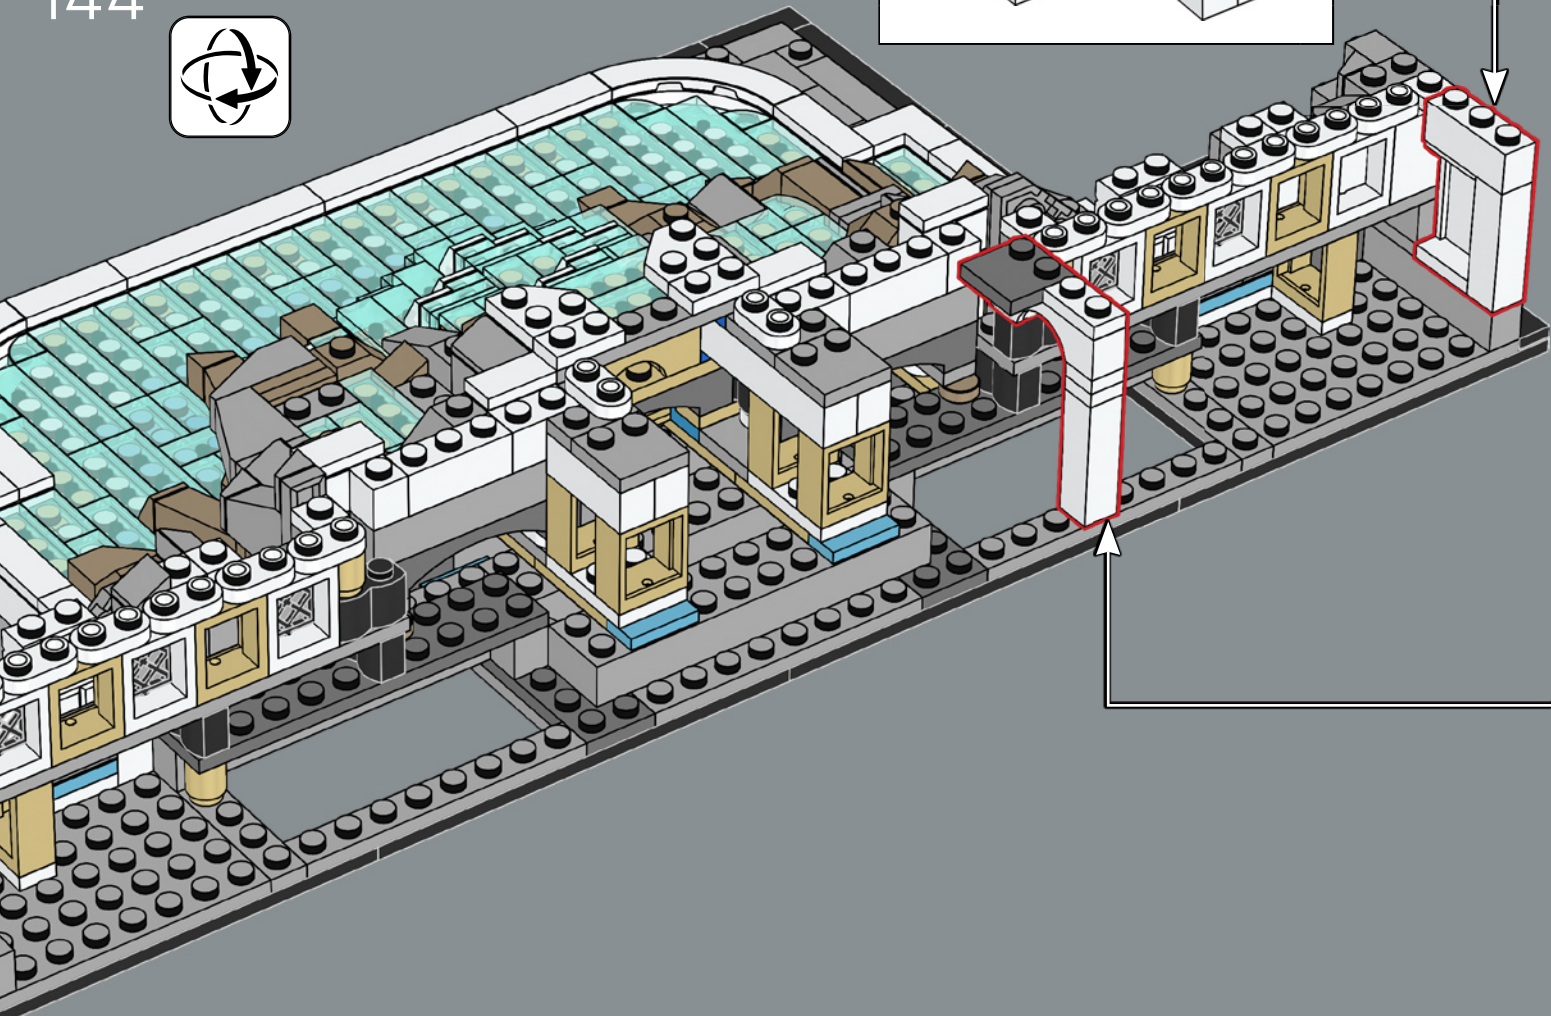

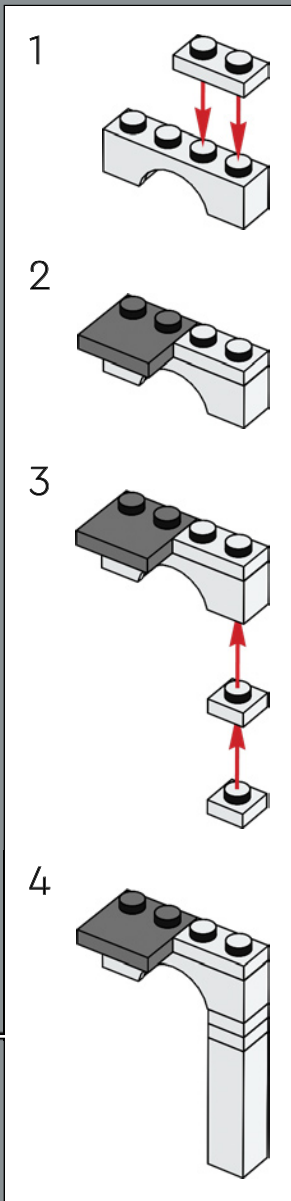

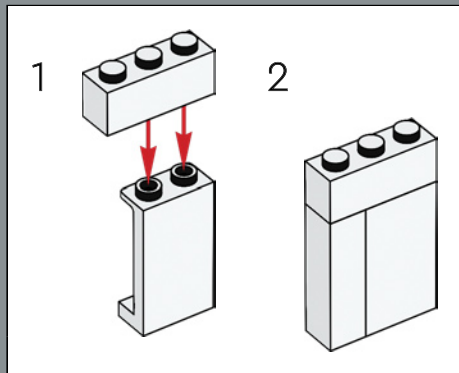

143

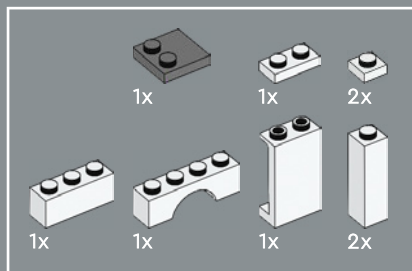

Questa piccola fontana è chiamata Fontana degli Innamorati per via dei suoi getti d'acqua incrociati. La leggenda dice che se due innamorati bevono da questa fontana rimarranno fedeli l'uno all'altro per sempre.

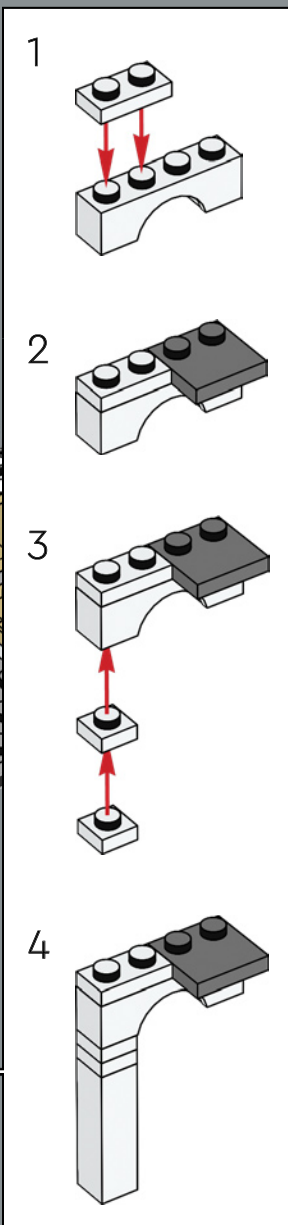

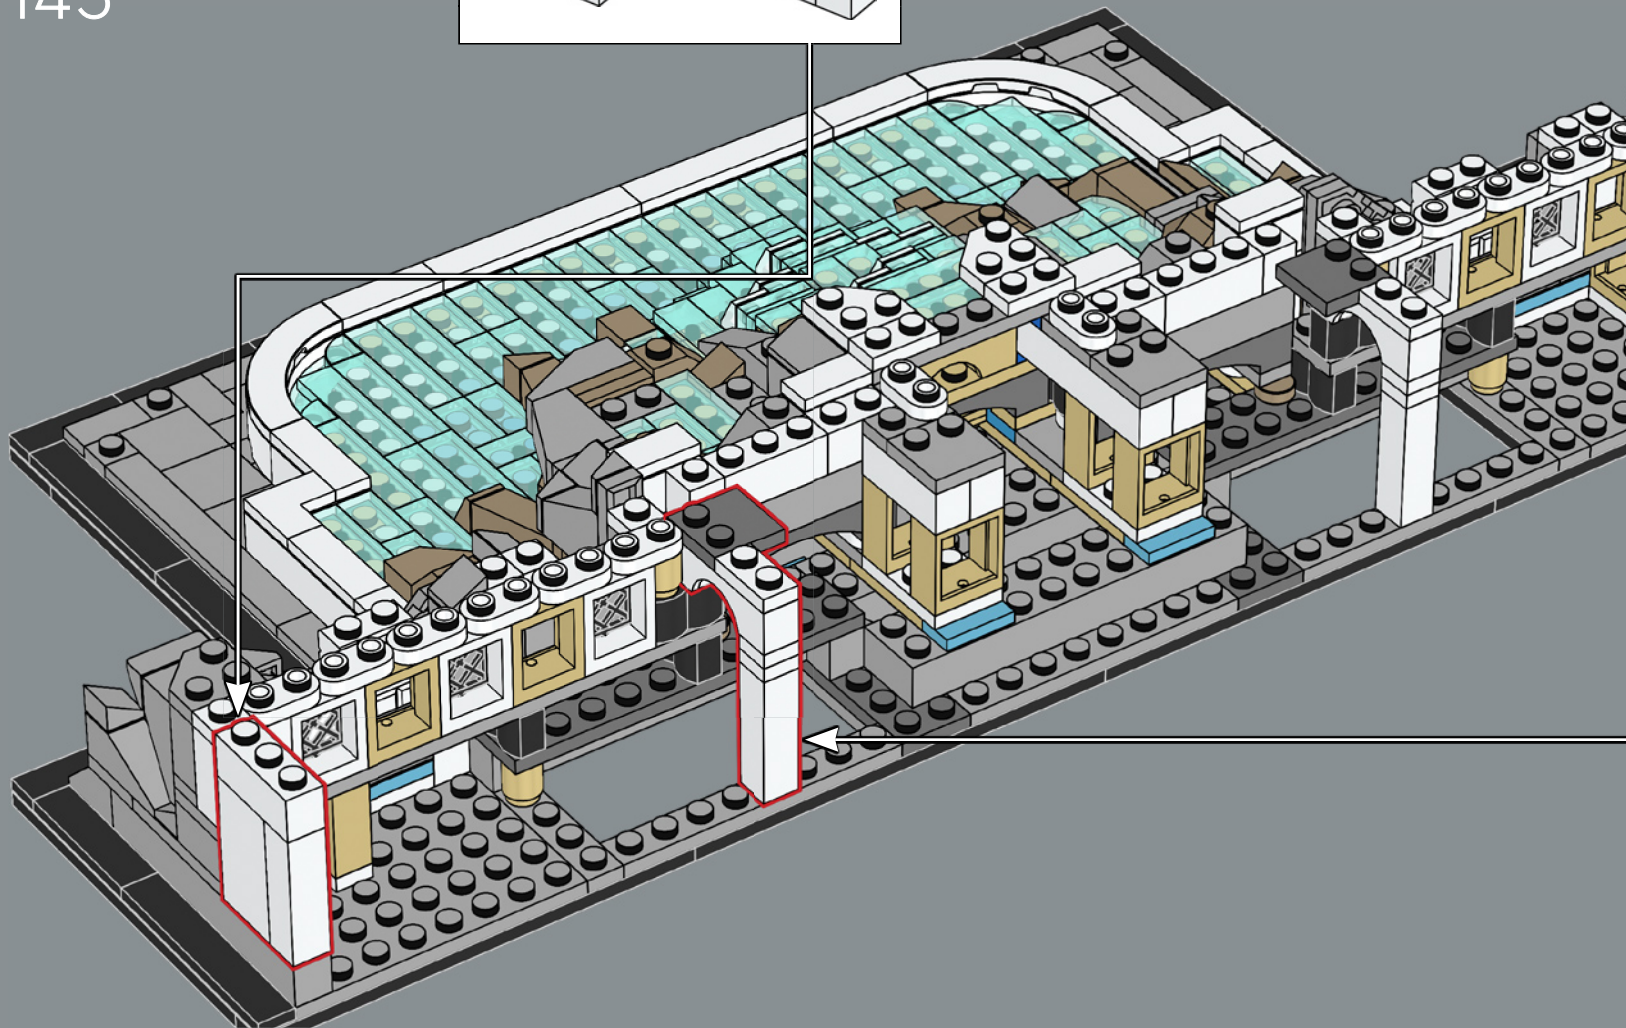

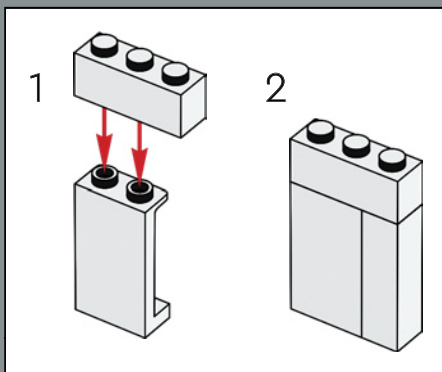

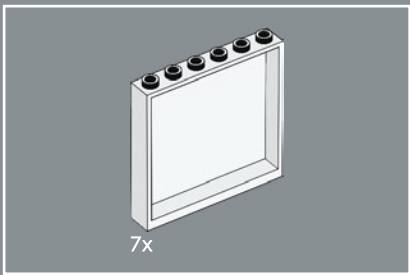

144

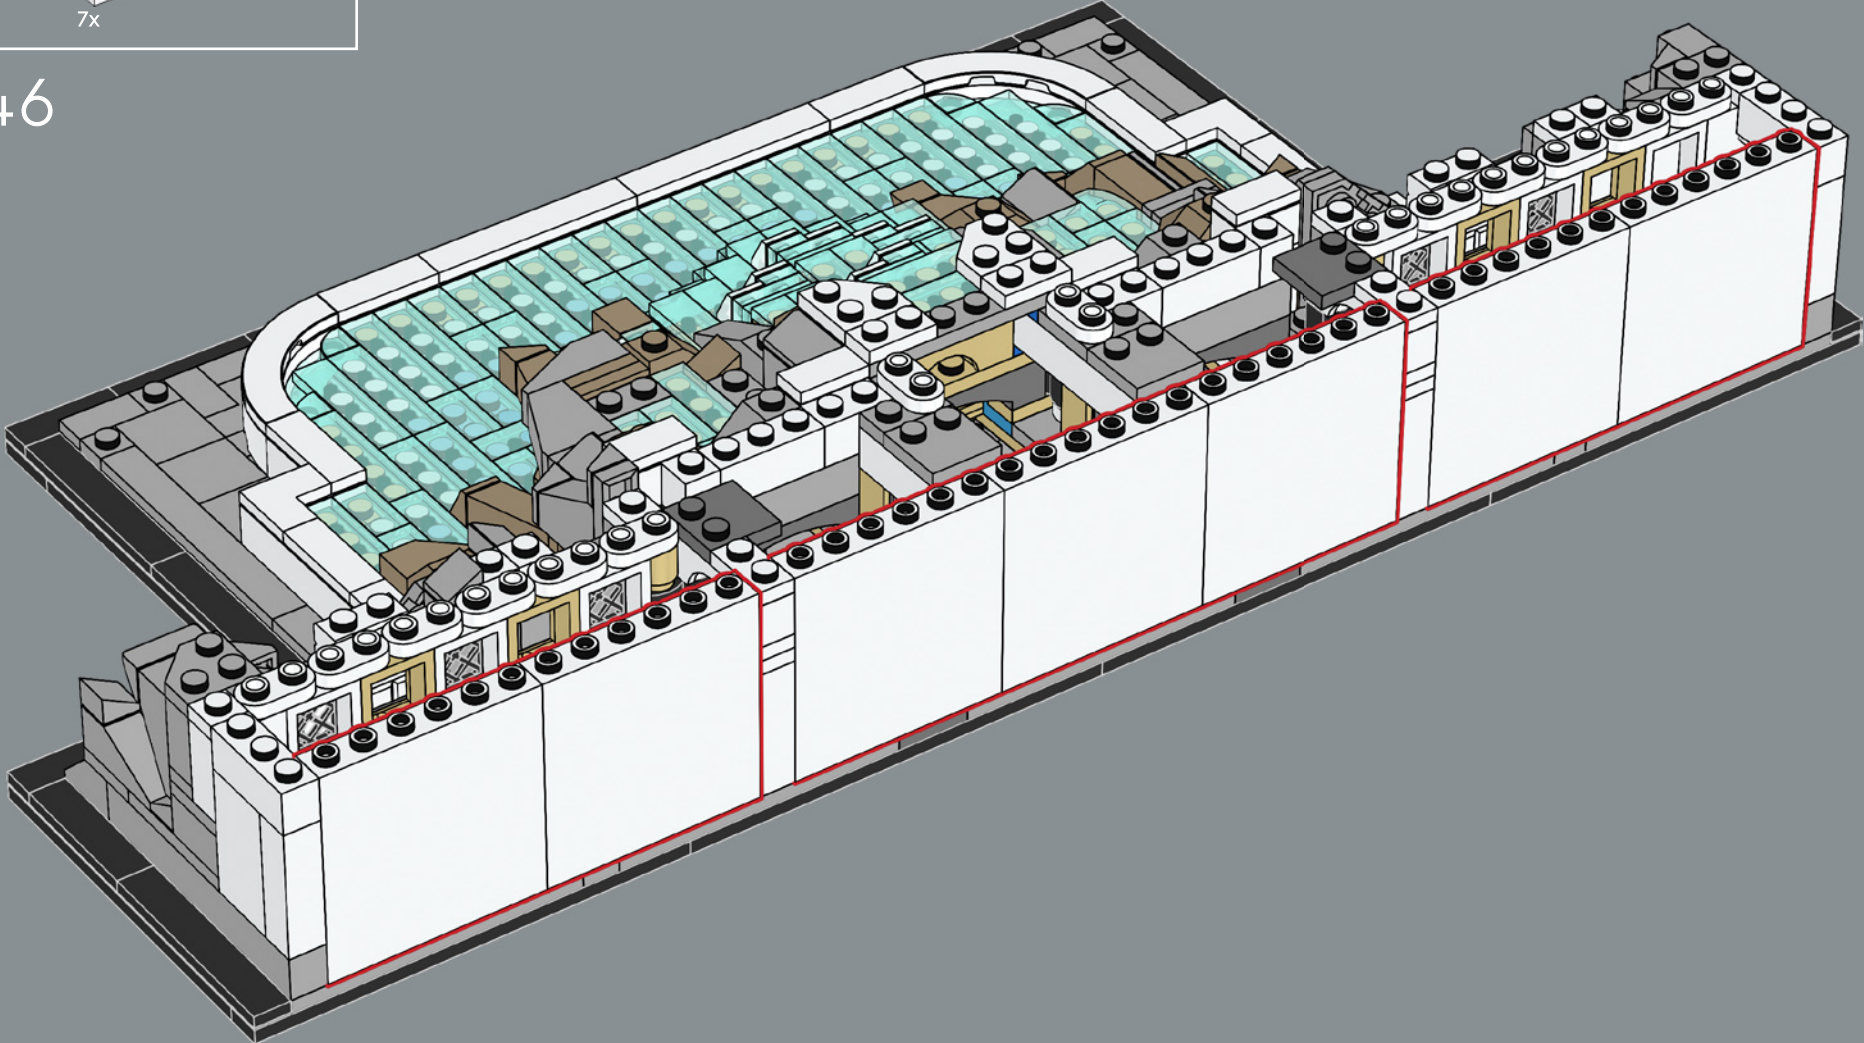

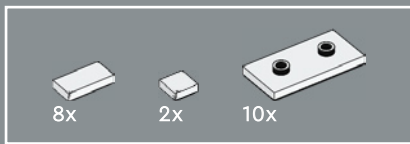

145

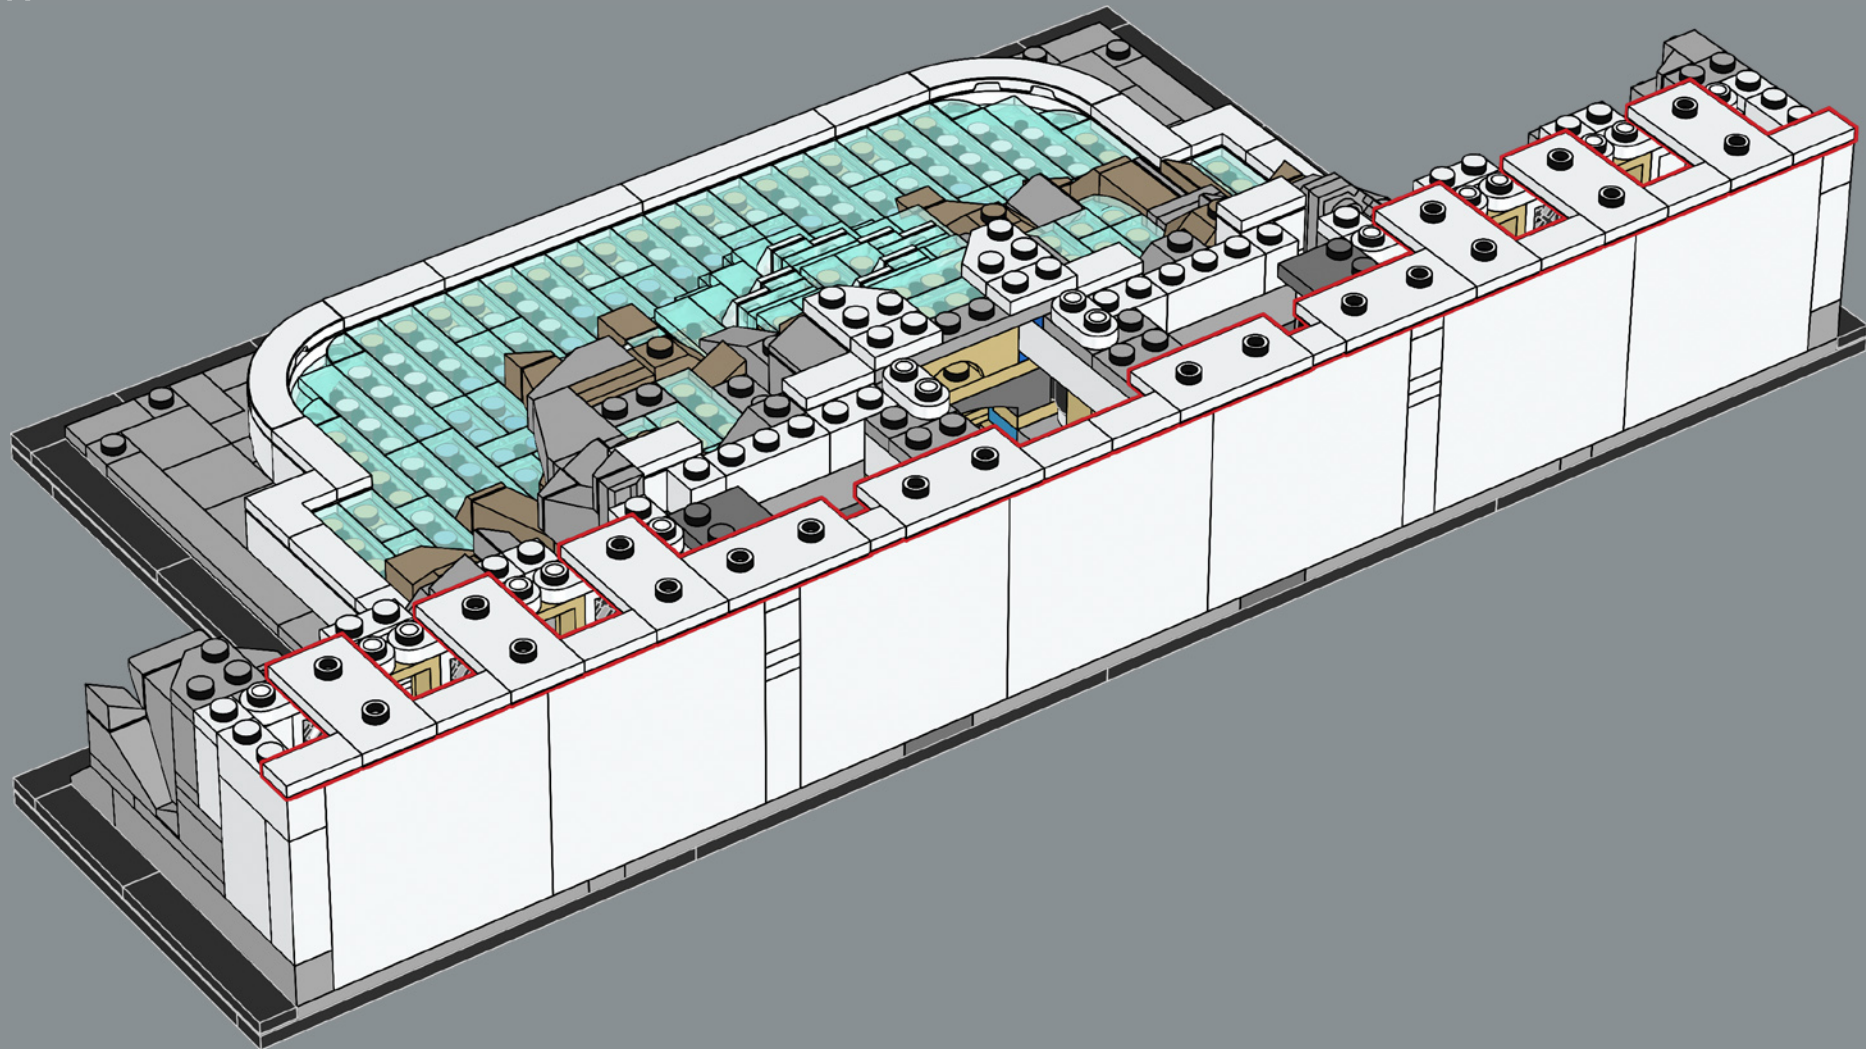

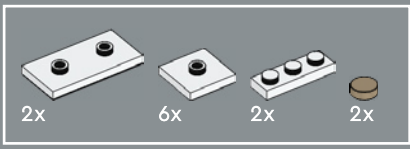

146

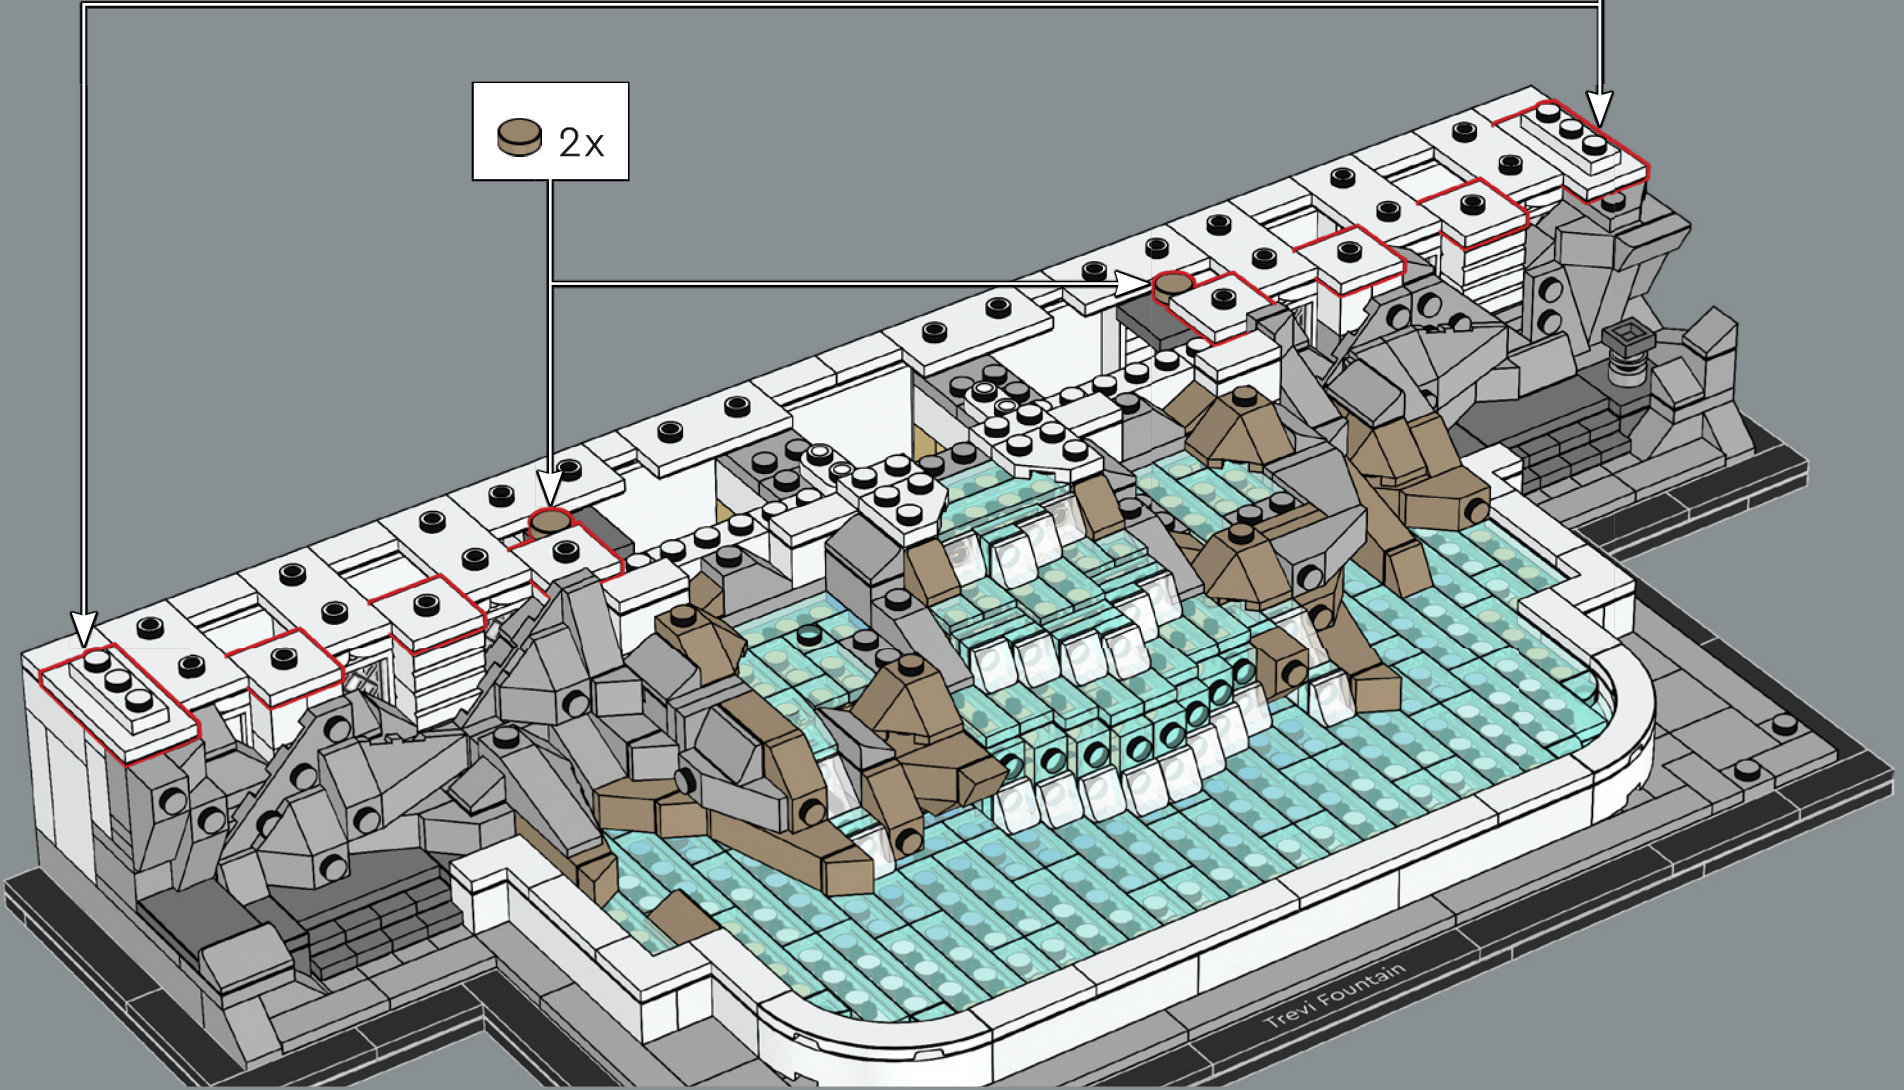

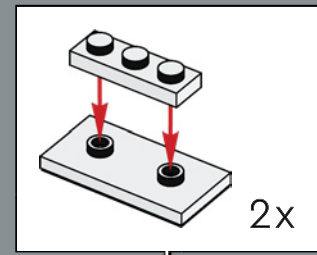

147

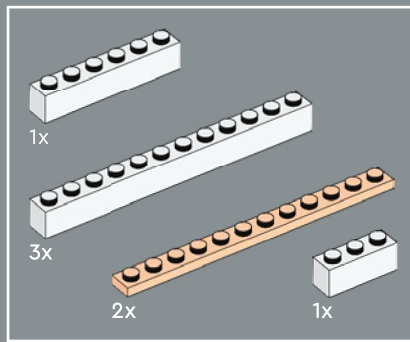

148

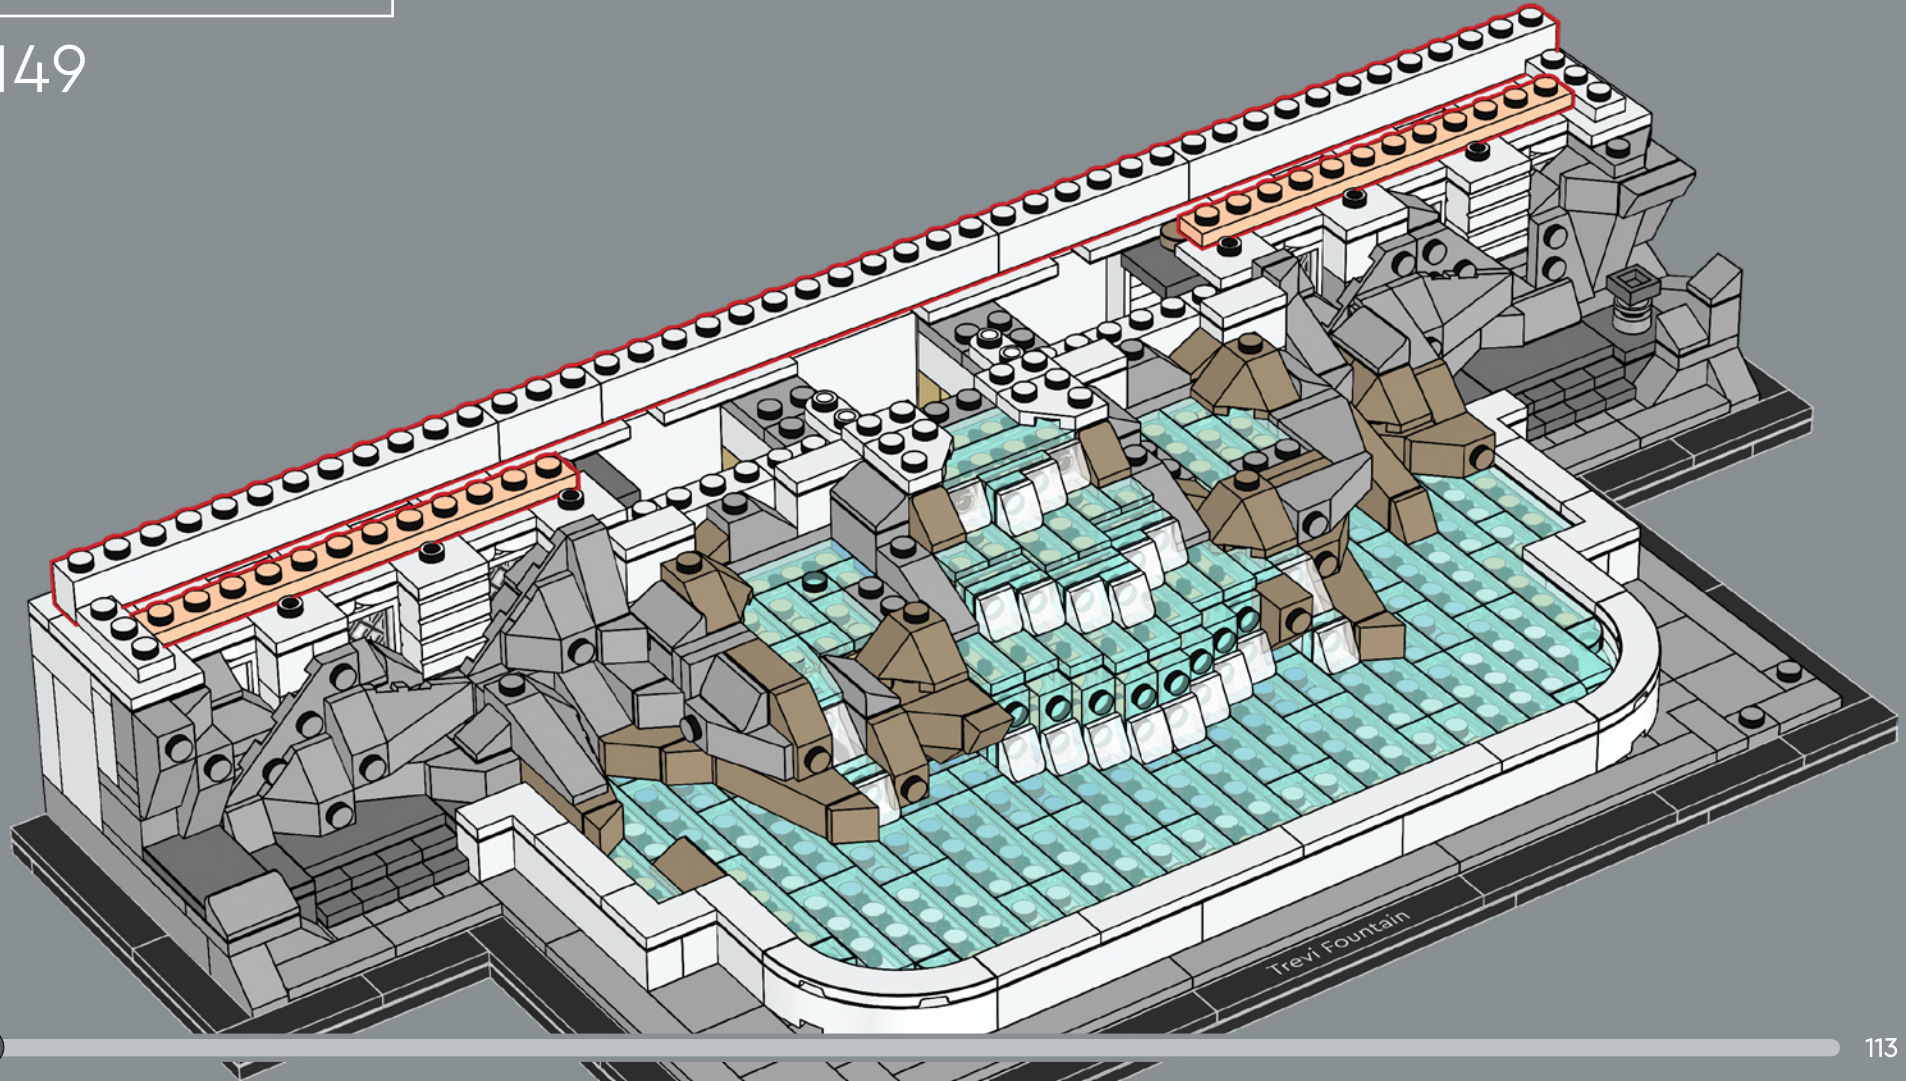

Per catturare correttamente i dettagli e la spaziatura nelle sporgenze e nelle porzioni sfalsate della facciata, abbiamo alternato griglie LEGO® standard con 1/2 basi fuori griglia. Questo ci ha aiutato a creare un flusso di costruzione regolare e un modello molto resistente.

Nella vita reale, la Fontana di Trevi è la facciata di Palazzo Poli, ex residenza papale che ora ospita un museo. L'edificio prosegue all'indietro con un'architettura più abbinata agli edifici circostanti che allo stile barocco della fontana.
